

# J.P. Morgan Mid Cap Value Strategy

## Separately Managed Account

**Designed to** provide capital appreciation primarily through a portfolio of high-quality U.S. mid-cap value equity securities.

### APPROACH

- Employs a bottom-up approach to invest in mid-cap stocks with attractive fundamentals
- Looks for companies with a competitive advantage, low cyclicality, significant free cash flow, strong management and attractive valuation
- Seeks to identify high quality companies that appear to be undervalued and have the potential for capital appreciation

### EXPERTISE

#### Strategy manager(s) and years of experience

Jonathan Simon, 38 yrs

Lawrence Playford, 25 yrs

Gloria Fu, 23 yrs

### STRATEGY INFORMATION

#### Launch date

Nov 30, 1988

## PERFORMANCE

**S1** Strategy (gross of fees)

**S2** Strategy (net of maximum allowable fees - 300 bps)\*

**B** Benchmark: Russell MidCap Value Index

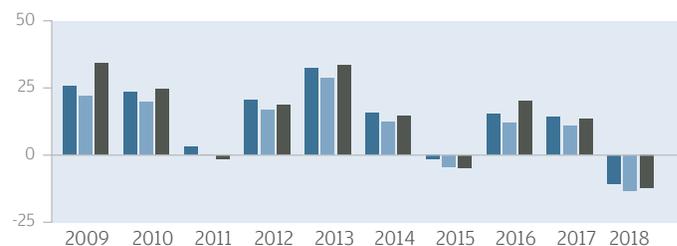

\*Please note, actual fees associated with this strategy may be lower.

## GROWTH OF \$100,000

Since inception with dividends and capital gains reinvested. There is no direct correlation between a hypothetical investment and the anticipated performance of the Strategy.

## CALENDAR YEAR PERFORMANCE (%)<sup>1</sup>

<b>S1</b>	25.81	23.42	3.00	20.41	32.47	15.74	-1.50	15.42	14.38	-10.61

The above characteristics are from a representative portfolio. Actual account characteristics of individual accounts may be different. Portfolio characteristics are as of 6/30/2019 and are based on individual securities in the Portfolio on that date. Securities in the Portfolio are subject to change. Statistics shown are not indicative of future statistics and are not representative of future Portfolio performance.

Due to rounding, values may not total 100%.

This document is a general communication being provided for informational purposes only. It is educational in nature and not designed to be a recommendation for any specific investment product, strategy, plan feature or other purpose. Any examples used are generic, hypothetical and for illustration purposes only. Prior to making any investment or financial decisions, an investor should seek individualized advice from a personal financial, legal, tax and other professional advisors that take into account all of the particular facts and circumstances of an investor's own situation.

**RISK SUMMARY**

The following risks could cause the Strategy's portfolio to lose money or perform more poorly than other investments.

The prices of equity securities are sensitive to a wide range of factors, from economic to company-specific news, and can fluctuate rapidly and unpredictably, causing an investment to decrease in value.

There is no guarantee that companies will declare, continue to pay or increase dividends.

**INDEXES**

Managed Accounts have fees that reduce their performance: indexes do not. You cannot invest directly in an index.

The Russell Midcap Value Index is an unmanaged index measuring the performance of those Russell Midcap companies with lower price-to-book ratios and lower forecasted growth values.

*Past performance is no guarantee of future results.*

**TOP HOLDINGS**

The top 10 holdings listed reflect only the Strategy's long-term investments. Short-term investments are excluded. Holdings are subject to change. The holdings listed should not be considered recommendations to purchase or sell a particular security. Each individual security is calculated as a percentage of the aggregate market value of the securities held in the Strategy and does not include the use of derivative positions, where applicable.

**PORTFOLIO ANALYSIS DEFINITIONS**

**P/E ratio** is the number by which earnings per share is multiplied to estimate a stock's value.

**P/B ratio** is the relationship between a stock's price and the book value of that stock.

**Dividend yield** is a ratio that shows how much a company pays out in dividends each year relative to its share prices. In the absence of any capital gains, the dividend yield is the return on investment for a stock.

**Earnings growth** is a measure of growth in a company's net income over a specific period.

**Return on equity (ROE)** is the amount of net income returned as a percentage of shareholders equity. Return on equity measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested.

**Return on assets** is an indicator of how profitable a company is relative to its total assets. ROA gives an idea as to how efficient management is at using its assets to generate earnings.

**Trailing 12-month turnover** is a percentage of holdings that are sold in a specific period.

**RISK ANALYSIS DEFINITIONS**

Risk measures are calculated based upon the broad-based index as stated in the prospectus.

**Beta** measures a Strategy's volatility in comparison to the market as a whole. A beta of 1.00 indicates a Strategy has been exactly as volatile as the market.

**Standard deviation** is a statistical measure of the degree to which an individual value in a probability distribution tends to vary from the mean of the distribution. The greater the degree of dispersion, the greater the risk.

**Information ratio** is a ratio of portfolio returns above the returns of a benchmark to the volatility of those returns.

**Tracking Error** The active risk of the portfolio, which determines the annualized standard deviation of the excess returns between the portfolio and the benchmark.

**Sharpe ratio** measures the fund's excess return compared to a risk-free investment. The higher the Sharpe ratio, the better the returns relative to the risk taken.

**ENTITIES**

J.P. Morgan Asset Management is the brand name for the asset management business of JPMorgan Chase & Co and its affiliates worldwide.
