
JPMorgan Global Convertibles Income Fund Limited

Half Year Report & Accounts for the six months ended 31st December 2015

Features

The Company

The Company is a closed-ended investment company, incorporated and registered in Guernsey, whose shares are listed on the London Stock Exchange. It is a non-cellular company and has been declared by the Guernsey Financial Services Commission to be a registered closed-ended collective investment scheme. The assets of the Company are managed by JPMorgan Funds Limited (the 'Manager'). The Manager has delegated the management of the portfolio to JPMorgan Asset Management (UK) Limited ('JPMAM' or 'Investment Manager').

Investment Objective

The Company will aim to provide investors with a dividend income, combined with the potential for long term capital growth, from investing in a globally diversified portfolio of convertible securities.

Investment Policy

The Company will invest in a globally diversified portfolio of convertible securities and other suitable instruments exhibiting convertible or exchangeable characteristics

Benchmark

The Company's benchmark is the MSCI World Index, (in Sterling terms) for reference purposes but will not be benchmark-driven in its asset allocation.

Capital Structure

At 31st December 2015, the Company's share capital comprised 219,630,000 ordinary shares of 1p each, including 646,518 shares held in Treasury.

Administrator

The Company employs J.P. Morgan Administration Services (Guernsey) Limited (the 'Administrator') as its administrator.

Website

The Company's website, which can be found at www.jpmconvertiblesincome.co.uk, includes useful information on the Company, such as daily prices, factsheets and will include current and historic half year and annual reports.

Financial Conduct Authority ('FCA') regulation of 'non-mainstream pooled investments'

The Company currently conducts its affairs so that the shares issued by the Company can be recommended by Independent Financial Advisers to ordinary retail investors in accordance with the FCA's rules in relation to non-mainstream pooled investment products and intends to continue to do so for the foreseeable future.

The shares are excluded from the FCA's restrictions which apply to non-mainstream investment products because they are shares in an investment company, which if it were domiciled in the United Kingdom, would currently qualify as an investment trust.

About the Company

CHAIRMAN'S STATEMENT

Dear Shareholders,

In the half year ended 31st December 2015 the total return on the Company's net assets dropped by 3.4%. The total return to shareholders was -7.8% due to the fact that the share price underperformed the net asset value ('NAV'). This was, of course, disappointing but perhaps is understandable given the challenges faced from a falling and volatile market.

Whilst performance of the Company's net assets was stronger than the broader convertibles market, the concurrence of declines in equity markets and the widening of credit spreads meant that the strategy did not exhibit as much of a defensive profile as we would have hoped for.

As you will see from the Investment Managers' Report, in the period leading up to the half year end, the deterioration in credit conditions prompted the Manager to increase the diversification within the portfolio. By raising the number of names and reducing the size of our most concentrated positions, the portfolio was repositioned. This avoided some of the sector and security specific problems seen in recent months, yet allowed it to capitalise on opportunities arising from the sell-off in high yielding bonds. The Board believes this to be a sensible compromise, since it enables us to retain exposure to valuations that appear cheap, relative to long term returns, and to credit spreads that arguably exaggerate the risk of recession (especially in the US). Performance since 31st December 2015 has been relatively strong compared to the broader markets, demonstrating the less volatile nature of the portfolio.

A more detailed analysis of performance is set out in the Investment Managers' Report on pages 5 to 6.

Dividends

The Company's objective is to provide investors with dividend income together with the potential for some modest capital growth in sterling terms. Your Investment Manager has considerable experience in managing convertible portfolios and adding value through the investment process. The Board has however recognised that the pursuit of a dividend at the current level is unduly constraining the Investment Manager's flexibility, given that medium term interest rates have declined since inception. As a consequence, the Board has encouraged the Investment Manager to focus instead on maximising the total return of the portfolio, but within overall similar risk parameters to the past. That said, your Board does not expect this to impact the dividend that you receive, even if, periodically, it requires capital to top up income.

During the half year ended 31st December 2015 one quarterly dividend totalling 1.125 pence per share was declared and paid. A second quarterly dividend of 1.125 pence per share was declared on 23rd February 2016 and will be paid on 31st March 2016.

The Board will continue to target an annual dividend of 4.5 pence per share for the foreseeable future.

CHAIRMAN'S STATEMENT *CONTINUED*

Managing the Discount

During the half year the Company's share price slipped from a modest premium to a discount relative to the NAV. The Company is authorised by the shareholders to buy-back up to 14.99% of the Company's issued share capital. This authority allows the Board to address any imbalance that may arise between the supply of and demand for shares, thereby helping it to control the discount to NAV.

The Board's approach to managing the discount is to buy-back shares if the discount to NAV exceeds 5% for any significant period of time. The Board has delegated the implementation of this to the Manager, in consultation with the Broker, but retains control of strategy and monitors the buy-back activity. In the half year the Company bought back 646,518 shares into Treasury. Since the period end, the Company has bought back a further 13,881,486 shares into Treasury.

Subject to any notable market movements, we expect to continue this approach. There can be no assurance that buy-backs alone will prevent a discount emerging or widening. The Company is of sufficient size that it can buy-back shares without compromising liquidity in its shares.

Borrowing

In July 2015 the Company entered into a two year \$32 million un-secured multicurrency revolving loan facility with Scotiabank Europe plc. This leverage has been used primarily to permit a shift towards higher quality and lower yielding names that offer the potential for good capital gains over the medium term. The Company may employ gearing up to a maximum of 20% of Net Asset Value at the time of borrowing. At the time of writing the Company was 2.8% geared.

Outlook

Concerns regarding China and global economic growth currently dominate the outlook for 2016. The heavy sell-off of high yielding bonds in December 2015 has continued into 2016 and has provoked liquidity concerns, which have since moved from credit markets into equity markets. After the long-delayed 'lift-off' in interest rates, further US rate increases now look less likely. Recent performance has been encouraging against this backdrop.

The Manager believes that whilst the market conditions remain difficult, they are starting to see opportunities emerge that will help the portfolio achieve long term income and capital gains. The repositioning of the portfolio has reduced concentration risk and allowed it to take advantage of the sell-off in high yielding bonds.

The Board continues to believe that the portfolio should, over the medium term, deliver an attractive, sustainable yield whilst offering the potential to participate in rising equity markets.

Simon Miller

Chairman

17th March 2016

INVESTMENT MANAGERS' REPORT

Performance Review

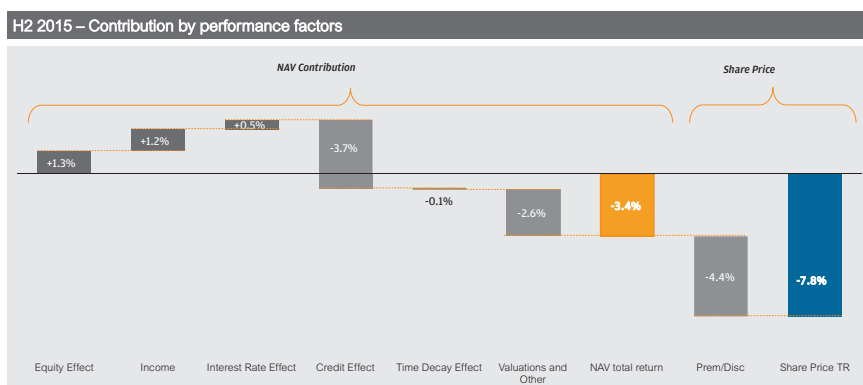

In the six months to 31st December 2015, the Company generated a share price return of -7.8% and a net asset value (NAV) total return of -3.4%. This period of difficult performance indicates the challenge in combining income generation with defensive positioning in the face of a number of significant market events over the review period. Firstly the recovery in energy prices reversed, followed by concerns regarding China and the impact of a Chinese slowdown on global growth. Financial conditions tightened into year end, dragging on the performance of companies with levered balance sheets, and this was then exacerbated by a significant widening in high yield credit spreads in December as a number of publicised hedge fund closures raised liquidity concerns. It is telling that amidst all this volatility, the arrival of 'lift-off' by the Federal Reserve ranks so low on the list of shocks to have hit markets over the review period.

The portfolio's equity sensitivity, income generation, and positive duration contributed to returns over the period, but these supportive factors were more than offset by weakness in credit factors. The currency hedging of the account detracted value over the period as Sterling generally weakened against other major currencies. However, full-currency hedging does tend to reduce the volatility of convertible portfolios, which are inherently less volatile than equity portfolios.

The portfolio's exposure to companies in the energy sector represented the largest detractor over the period following renewed commodity price weakness, even though we had used the recovery in early 2015 to reduce the portfolio's exposure to just 5.6% going into the second half of the year. More encouragingly, the portfolios increased diversification into technology and non-cyclical consumer sectors added value as these were among the only sectors to post a positive return over the period.

NAV and Share price performance: Estimated contribution

Source: J.P. Morgan Asset Management. These estimated portfolio and sub-category returns have been calculated using an internal J.P. Morgan Asset Management analytical model, and should be considered as indicative only. 'Performance' figures represent total return calculations in local currency; 'Contribution' is the estimated total contribution to portfolio returns. Pricing sources used to calculate returns are a composite of counterparty-provided pricing inputs. Equity effect = impact of underlying equity performance; Credit effect = impact of changes to input credit spreads; Interest rate effect = impact of changes in risk-free rate; Currency effect = impact of changes in FX rates on cross-currency convertibles; Time decay effect = combination of option cost and accrual to maturity; Income effect = coupon income; Valuations and Other = Residual, including changes in discount to theoretical value and fees. Prem/Disc effect = When the market price of the Trust's shares is worth less than the NAV per share, then the Trust is said to be trading at a discount. When the market price of the Trust's shares is worth more than the NAV per share, then the Trust is said to be trading at a premium.

Portfolio Review

We believe the challenging market conditions referred to above have started to create attractive opportunities for the portfolio, but we held a cautious view throughout the review period. In particular, we sought to reconcile attractive valuations at the aggregate level with a sense that credit conditions were tightening at an issuer-specific level.

The primary way in which this review was reflected within the portfolio was an increase in the number of holdings, from 78 at the start of the review period to 104 by the end of the year. This enabled us to remain fully invested, supporting the yield and maintaining

INVESTMENT MANAGERS' REPORT *CONTINUED*

exposure to the valuation component, while simultaneously reducing the risk of negative company-specific events. The primary source of these additional names was securities that had previously occupied the 'balanced' space of the convertible market, but which had picked up yield following market weakness. This enabled us to continue the sector rotation we had started in the beginning of the year, reducing energy still-further to a 4.1% allocation by the end of the year and increasing the exposure to non-cyclical consumer names from 6.5% (31st June 2015) to 10.5% (31st December 2015) and the technology (including internet) exposure from 13.1% to 18.9%. In addition to reducing our energy exposure, we also reduced allocations to basic materials (4.8% to 3.6%) and more significantly non-real estate financials (15.8% to 8.4%). The rationale for this reduction in exposure to non-real estate financials was to limit exposure to companies that we considered to have most exposure to the credit cycle, such as Business Development Companies in the United States.

Outlook

The fact that detrimental credit conditions more than offset the positive impact of a decline in effective interest rates (despite 'lift-off') is indicative of the fact that convertibles tend to move more in line with high-yield credit than with investment grade fixed income. Consequently, a scenario in which the US economy improves to the extent that the Federal Reserve feels able to resume rate hikes is likely to represent a more positive outcome for convertibles than an environment in which growth stagnates and duration assets continue to perform. Nevertheless, economic data has softened and we are looking to position the portfolio to perform in an environment where conditions remain somewhat challenging.

We believe that the market weakness going into 2016 has opened up some opportunities within the portfolio, particularly to the extent that we think a large proportion of high yield weakness has been driven by technical factors rather than a significant deterioration in fundamentals. This has given us comfort in initiating positions in higher yielding securities, although we have done so cautiously.

We believe that the long-term benefits of an income-focused approach to the convertible market express themselves in two principal ways.

Firstly, the diversification of return drivers across fixed income and equity factors, supported by stable income generation, helps to provide a low volatility return profile without over-reliance on any one factor. This has arguably been seen over recent months, where the NAV performance of the trust, while disappointing on an absolute basis, has held up against high yield comparators (the Barclays Global Corporate High Yield index was down by 5.6% over the review period, hedged into GBP).

Secondly, a yield-focused convertible strategy has traditionally performed well following periods of market dislocation, such as that which characterised the period in which the Company was incorporated. While we remain more cautiously positioned than we were at the time of inception, we do believe that the emergence of significant dislocations into 2016 could provide a fruitful hunting ground over the next 12 months.

¹ The 2014 figures have been amended due to a change in allocation.

Earnings per share is based on the weighted average number of shares in issue during the period.

The Company does not have any income or expense that is not included in net return for the period. Accordingly the 'Net profit/(loss) for the period' is also the 'Total comprehensive income for the period', as defined in IAS 1 (revised).

The 'Total' column of this statement is the profit and loss account of the Company and the 'Revenue' and 'Capital' columns represent supplementary information prepared under guidance issued by the Association of Investment Companies.

All items in the above statement derive from continuing operations. No operations were acquired or discontinued in the period.

NOTES TO THE FINANCIAL STATEMENTS FOR THE SIX MONTHS ENDED 31ST DECEMBER 2015

1. Financial statements

The information contained within the financial statements in this half year report has not been audited or reviewed by the Company's auditors.

2. Accounting policies

The Company's financial statements have been prepared in accordance with International Financial Reporting Standards ('IFRS'), which comprise standards and interpretations approved by the International Accounting Standards Board to the extent that they have been adopted by the European Union. The same accounting policies and methods of compensation are followed in these financial statements as compared with the most recent annual financial statements.

Where presentational evidence set out in the Statement of Recommended Practice (the 'SORP') issued by the Association of Investment Companies in November 2014 is consistent with the requirement of IFRS, the financial statements have been prepared on a basis compliant with the recommendation of SORP.

The Board has agreed to allocate management fees and finance costs of 35% to capital and 65% to revenue, reflecting the investment objective of the Company.

The cost of repurchasing ordinary shares into Treasury, including the related transaction costs, is charged to capital reserves and dealt with in the Statement of Changes in Equity.

All of the Company's operations are of a continuing nature.

The financial statements have been prepared on a going concern basis.

3. Dividend paid

	(Unaudited) Six months ended 31st December 2015 £'000	(Unaudited) Six months ended 31st December 2014 £'000	(Audited) Year ended 30th June 2015 £'000
2015 fourth interim dividend 1.125p (2014: second interim dividend of 2.25p)	2,464	4,686	4,686
2016 first interim dividend of 1.125p (2015: 1.125p)	2,464	2,402	2,402
2015 second interim dividend of 1.125p	–	–	2,465
2015 third interim dividend of 1.125p	–	–	2,471
Total dividends paid in the period/year	4,928	7,088	12,024

A second interim dividend of 1.125p per share, has been declared payable in respect of the six months ended 31st December 2015.

NOTES TO THE FINANCIAL STATEMENTS *CONTINUED*

4. Earnings/(loss) per share

	(Unaudited) Six months ended 31st December 2015 £'000	(Unaudited) Six months ended 31st December 2014 £'000	(Audited) Year ended 30th June 2015 £'000
Earnings/(loss) per share is based on the following:			
Revenue return	4,303	4,512	8,300
Capital loss	(11,837)	(15,022)	(10,119)
Total loss	(7,534)	(10,510)	(1,819)
Weighted average number of shares in issue during the period			
	219,277,482	190,106,594	204,652,876
Revenue return per share	1.96p	2.37p	4.06p
Capital loss per share	(5.40)p	(7.90)p	(4.94)p
Total loss per share	(3.44)p	(5.53)p	(0.88)p

5. Net asset value per share

	(Unaudited) 31st December 2015 £'000	(Unaudited) 31st December 2014 £'000	(Audited) 30th June 2015 £'000
Shareholders' funds (£'000)	209,244	214,720	222,311
Number of shares in issue	218,983,482	215,830,000	219,630,000
Net asset value per share (pence)	95.6	99.5	101.2

6. Disclosures regarding financial instruments measured at fair value

The disclosures required by the IFRS 13: 'Fair Value Measurement' are given below. The Company's financial instruments within the scope of IFRS 13 that are held at fair value comprise its investment portfolio.

The investments are categorised into a hierarchy consisting of the following three levels:

Level 1 - valued using unadjusted quoted prices in active markets for identical assets and liabilities.

Level 2 - valued by reference to valuation techniques using other observable inputs not included within Level 1.

Level 3 - valued by reference to valuation techniques using unobservable inputs.

Categorisation within the hierarchy has been determined on the basis of the lowest level input that is significant to the fair value measurement of the relevant asset.

The recognition and measurement policies for financial instruments measured at fair value are consistent with those disclosed in the last annual financial statements.

The following tables set out the fair value measurements using the IFRS 13 hierarchy at the relevant period/year end:

	31st December 2015			Total £'000
	Level 1 £'000	Level 2 £'000	Level 3 £'000	
Financial assets held at fair value through profit or loss				
Investments:				
- Convertibles	165,663	8,696	–	174,359
- Preference	21,909	–	–	21,909
- Fixed Interest	20,454	–	–	20,454
- Liquidity Fund	11,612	–	–	11,612
Total investments	219,638	8,696	–	228,334
Derivative financial assets:				
- Forward foreign currency contracts	–	282	–	282
- Option contracts	–	64	–	64
Total financial assets	219,638	9,042	–	228,680
Financial liabilities held at fair value through profit or loss				
Derivative financial liabilities:				
- Forward foreign currency contracts	–	(4,489)	–	(4,489)
- Future contracts	–	(103)	–	(103)
Total financial liabilities	–	(4,592)	–	(4,592)
	30th June 2015			Total £'000
	Level 1 £'000	Level 2 £'000	Level 3 £'000	
Financial assets held at fair value through profit or loss				
Investments:				
- Fixed Interest	22,306	–	–	22,306
- Convertibles	174,365	2,724	–	177,089
- Preference	16,092	–	–	16,092
Total investments	212,763	2,724	–	215,487
Derivative financial assets:				
- Forward foreign currency contracts	–	6,232	–	6,232
- Future contracts	–	302	–	302
Total financial assets	212,763	9,258	–	222,021
Financial liabilities held at fair value through profit or loss				
Derivative financial liabilities:				
- Forward foreign currency contracts	–	(304)	–	(304)

The Company's policy for determining transfers between levels is to ascertain the listing status at each period and for each investment and determine if any changes have occurred that would necessitate a transfer.

Fair values of financial assets and financial liabilities

All financial assets and liabilities are either included in the Statement of Financial Position at fair value or the carrying amount is a reasonable approximation of fair value.

Shareholder Information

INTERIM MANAGEMENT REPORT

The Company is required to make the following disclosures in its interim report.

Principal Risks and Uncertainties

The principal risks and uncertainties faced by the Company fall into the following broad categories: investment and strategy; foreign currency; accounting; corporate governance and shareholder relations; operational and financial. Information on each of these areas is given in the Business Review within the 2015 Annual Report and Accounts.

Related Party Transactions

During the half year to 31st December 2015, no new agreements were entered into with related parties which have materially affected the financial position or the performance of the Company.

Going Concern

The Directors believe, having considered the Company's investment objectives, risk management policies, capital management policies and procedures, nature of the portfolio and expenditure projections, that the Company has adequate resources, an appropriate financial structure and suitable management arrangements in place to continue in operational existence for the foreseeable future and, more specifically, that there are no material uncertainties pertaining to the Company that would prevent its ability to continue in such operation existence for at least 12 months from the date of the approval of this half yearly financial report. For these reasons, they consider there is reasonable evidence to adopt the going concern basis in preparing the accounts.

Directors' Responsibilities

The Board of Directors confirms that, to the best of its knowledge:

- (i) the condensed set of financial statements contained within the interim financial report has been prepared in accordance with International Accounting Standard 34 'Interim Financial Reporting' and gives a true and fair view of the state of affairs of the Company and of the assets, liabilities, financial position and net return of the Company, as at 31st December 2015, as required by the UK Listing Authority Disclosure and Transparency Rules 4.2.4R; and
- (ii) the interim report includes a fair review of the information required by 4.2.7R (important events that have occurred since inception, their impact on these financial statements and a description of the principal risks facing the Company) and 4.2.8R (related party transactions since inception that have materially affected the financial position or performance of the Company) of the UK Listing Authority Disclosure and Transparency Rules.

In order to provide these confirmations, and in preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business;

and the Directors confirm that they have done so.

For and on behalf of the Board

Philip Taylor
Director

17th March 2016

GLOSSARY OF TERMS AND DEFINITIONS

Return to Ordinary Shareholders

Share price total return to the Ordinary shareholder, on a mid-market price to mid-market price basis, assuming that all dividends received were reinvested, without transaction costs, into the Ordinary shares of the Company at the time the shares were quoted ex-dividend.

Return on Net Assets

Return on the undiluted net asset value ('NAV') per share on a bid value to bid value basis, assuming that all dividends paid out by the Company were reinvested into the shares of the Company at the NAV per share at the time the shares were quoted ex-dividend.

Share Price Premium to Net Asset Value ('NAV') Per Share

If the share price of an investment trust is lower than the NAV per share, the shares are said to be trading at a discount. The discount is shown as a percentage of the NAV per share. The opposite of a discount is a premium. It is more common for an investment trust's shares to trade at a discount than at premium.

Gearing/Net Cash

Gearing represents the excess amount above shareholders' funds of total assets expressed as a percentage of the shareholders' funds. Total assets include total investments and net current assets/liabilities less cash/cash equivalents and excluding bank loans of less than one year. If the amount calculated is negative, this is shown as a 'net cash' position.

Ongoing Charges

The Ongoing Charges represent the Company's management fee and all other operating expenses excluding finance costs, expressed as a percentage of the average of the daily net assets during the year and is calculated in accordance with guidance issued by the Association of Investment Companies.

Gearing/Net Cash

Gearing represents the excess amount above shareholders' funds of total assets (including net current assets/(liabilities)) less cash/cash equivalents, expressed as a percentage of shareholders' funds. If the amount calculated is negative, this is shown as a 'net cash' position.

Earnings per Share

The earnings per Ordinary share represents the return on ordinary activities after taxation divided by the weighted average number of Ordinary shares in issue during the year.

Bond-like

Bond-like convertible securities are those with a relatively stable credit and has a fixed income value far greater than the value of the underlying equity. It is largely insensitive to changes in the value of the underlying equity.

Balanced

Balanced convertible securities are those where the underlying equity value and the bond value of the security are within a fairly close range of each other. This makes the value of the instrument sensitive to both changes in the underlying equity and the fixed income value of the security.

Shareholder Information

Financial Conduct Authority

Beware of share fraud

Fraudsters use persuasive and high-pressure tactics to lure investors into scams. They may offer to sell shares that turn out to be worthless or non-existent, or to buy shares at an inflated price in return for an upfront payment. While high profits are promised, if you buy or sell shares in this way you will probably lose your money.

How to avoid share fraud

- 1 Keep in mind that firms authorised by the FCA are unlikely to contact you out of the blue with an offer to buy or sell shares.
- 2 Do not get into a conversation, note the name of the person and firm contacting you and then end the call.
- 3 Check the Financial Services Register from www.fca.org.uk to see if the person and firm contacting you is authorised by the FCA.
- 4 Beware of fraudsters claiming to be from an authorised firm, copying its website or giving you false contact details.
- 5 Use the firm's contact details listed on the Register if you want to call it back.
- 6 Call the FCA on **0800 111 6768** if the firm does not have contact details on the Register or you are told they are out of date.
- 7 Search the list of unauthorised firms to avoid at www.fca.org.uk/scams.
- 8 Consider that if you buy or sell shares from an unauthorised firm you will not have access to the Financial Ombudsman Service or Financial Services Compensation Scheme.
- 9 Think about getting independent financial and professional advice before you hand over any money.
- 10 **Remember:** if it sounds too good to be true, it probably is!

Report a scam

If you are approached by fraudsters please tell the FCA using the share fraud reporting form at www.fca.org.uk/scams, where you can find out more about investment scams.

You can also call the FCA Consumer Helpline on **0800 111 6768**.

If you have already paid money to share fraudsters you should contact Action Fraud on **0300 123 2040**.

5,000 people contact the Financial Conduct Authority about share fraud each year, with victims losing an average of £20,000
