## ALTERNATIVE INVESTMENT FUND MANAGERS DIRECTIVE ('AIFMD') DISCLOSURES (UNAUDITED)

### Leverage

For the purposes of the Alternative Investment Fund Managers Directive ('AIFMD'), leverage is any method which increases the Company's exposure, including the borrowing of cash and the use of derivatives. It is expressed as a ratio between the Company's exposure and its net asset value and can be calculated on a gross and a commitment method in accordance with AIFMD. Under the gross method, exposure represents the sum of the Company's positions without taking into account any hedging and netting arrangements. Under the commitment method, exposure is calculated after certain hedging and netting positions are offset against each other.

The Company is required to state its maximum and actual leverage levels, calculated as prescribed by the AIFMD, at 30th September 2016, which gives the following figures:

Leverage Exposure	Gross Method	Commitment Method
Maximum limit	200%	200%
Actual <sup>1</sup>	106%	105%

<sup>1</sup> The above figures are theoretical and are calculated in accordance with the methodology prescribed by the AIFMD.
