Exploring the Expertise of JPMorgan Multi-Asset Solutions

Proven Multi-asset Investors and Underlying Managers

Award-winning Multi-asset Expertise

Markets evolve. Business cycles peak and trough. But for over 46 years, most of the world’s largest institutions and sophisticated investors have turned to J.P. Morgan Multi-Asset Solutions to access opportunities and navigate global markets on their behalf. The team’s 89 investment professionals share a single objective — help clients meet their most complex and critical investment goals.

Single-point Access to the Best of J.P. Morgan

Multi-Asset Solutions integrates the industry’s foremost team of asset allocation specialists with the breadth and depth of J.P. Morgan’s global investment platform — 500 investment strategies across asset classes, geographies and investment styles.

A Team Approach Drives Better Investment Outcomes

The team’s process for managing the Funds leverages the strength of J.P. Morgan’s global investment platform by allocating across asset classes and selecting the best investments in each, thereby increasing the diversity of ideas and reducing dependence on any one person.

Strength in Numbers*

Balancing Risk and Reward in a Global Portfolio

Identifying attractive investment opportunities is only half the challenge. Implementing them in an efficient and effective way is equally important — and equally difficult. Multi-Asset Solutions’ investment process seeks to ensure investors benefit from J.P. Morgan’s best thinking within tailored portfolios that aim to deliver optimal client outcomes, while maintaining stringent risk controls, governance and due diligence procedures.
A set of diversified portfolios to suit a range of needs

J.P. Morgan offers four Investor Funds each holding a diversified mix of asset classes, investment styles and strategies carefully targeted to pursue a specific investor need. Whether you are looking for current income, long-term growth or a combination of both, speak with your financial professional to learn more about the Investor Funds.

INVESTOR CONSERVATIVE GROWTH FUND

INVESTOR BALANCED FUND

INVESTOR GROWTH & INCOME FUND

INVESTOR GROWTH FUND

■ Equity funds 20–40%
■ Fixed income funds 55–80%
■ Specialty funds 0–10%
■ Money market funds 0–10%

MORE CONSERVATIVE (Shorter time horizon, lower risk tolerance)  (Longer time horizon, higher risk tolerance) MORE AGGRESSIVE

Diversification and asset allocation do not guarantee investment returns and do not eliminate the risk of loss. Past performance does not guarantee future results.
Success
Competitive returns with less volatility on the downside

Income or growth? Why not both?
Investor Funds have delivered consistent income while providing opportunity for growth.

Growth and Income Fund
A $100,000 initial investment in Growth & Income 20 years ago would’ve enabled an investor to withdraw $4,000 per year – while still growing their principle.

Balanced Fund
The Balanced Fund has similarly allowed for income while delivering gains that grew an investor’s nest egg.

If you had invested in any one of the four Investor Funds, in comparison to the S&P 500, your investment would have:

• Resulted in a greater percentage of positive returns over rolling three-, five- and 10-year periods
• Experienced better results in a down market
• Grown, even in the “lost decade” of the 2000s
• Had less volatility (lower standard deviation)

With an Investor Fund, broad diversification and reducing volatility on the downside can help you realize greater return potential than U.S. Treasury bills with lower volatility than stocks.

Participating in the upside, mitigating risk on the downside

**ANNUAL EXPENSES:** The Fund’s adviser and/or its affiliates have contractually agreed to waive fees and/or reimburse expenses to the extent Total Annual Fund Operating Expenses (excluding acquired fund fees and expenses, dividend and interest expenses related to short sales, interest, taxes, expenses related to litigation and potential litigation and extraordinary expenses) exceed 0.55% (A Shares) 0.30% (I Shares) of the average daily net assets. This waiver is in effect through 10/31/2020, at which time the adviser and/or its affiliates will determine whether to renew or revise it.
NEXT STEPS
To learn more about expanding diversification through a risk-based asset allocation portfolio with a JPMorgan Investor Fund:

- Consult your financial professional
- Call 1-800-480-4111
- Visit www.jpmorganfunds.com

Contact JPMorgan Distribution Services, Inc. at 1-800-480-4111 for a fund prospectus. You can also visit us at www.jpmorganfunds.com. Investors should carefully consider the investment objectives and risks as well as charges and expenses of the mutual fund before investing. The prospectus contains this and other information about the mutual fund. Read the prospectus carefully before investing.

This document is a general communication being provided for informational purposes only. It is educational in nature and not designed to be a recommendation for any specific investment product, strategy, plan feature or other purpose. Any examples used are generic, hypothetical and for illustration purposes only. Prior to making any investment or financial decisions, an investor should seek individualized advice from personal financial, legal, tax and other professional advisors that take into account all of the particular facts and circumstances of an investor’s own situation.

RISKS ASSOCIATED WITH INVESTING IN THE FUND:
Asset allocation/Diversification does not guarantee investment returns and does not eliminate the risk of loss. The Fund’s fixed income securities are subject to interest rate risk. If rates increase, the value of the Fund’s investments generally declines. The Fund may invest in securities that are below investment grade (i.e., “high yield” or “junk bonds”) that are generally rated in the fifth or lower rating categories of Standard & Poor’s and Moody’s Investors Service. Although these securities tend to provide higher yields than higher-rated securities, there is a greater risk that the Fund’s share price will decline. International investing involves a greater degree of risk and increased volatility. Changes in currency exchange rates and differences in accounting and taxation policies outside the U.S. can raise or lower returns. Also, some overseas markets may not be as politically and economically stable as the United States and other nations. The risks associated with foreign securities are magnified in countries in “emerging markets.” These countries may have relatively unstable governments and less-established market economies than developed countries. Emerging markets may face greater social, economic, regulatory and political uncertainties. These risks make emerging market securities more volatile and less liquid than securities issued in more developed countries.

The Fund may invest in mortgage-related and asset-backed securities, including so-called “sub-prime mortgages” that are subject to certain other risks, such as prepayment and call risks. During periods of declining asset value, difficult or frozen credit markets, swings in interest rates or deteriorating economic conditions, mortgage-related and asset-backed securities may decline in value, face valuation difficulties, become more volatile and/or become illiquid. The Fund may invest in derivatives that may be riskier than other types of investments because they may be more sensitive to changes in economic or market conditions and could result in losses that significantly exceed the Fund’s original investment. Many derivatives create leverage that can cause the Fund to be more volatile than it would be if it had not used derivatives. There can be no assurance that the professionals currently employed by JPMAM or that the past performance or success of any such professionals serves as an indicator of such professional’s future performance or success. There can be no assurance that the professionals currently employed by JPMAM or that the past performance or success of any such professionals serves as an indicator of such professional’s future performance or success. Investment strategies are selected from both J.P. Morgan and third-party asset managers and are subject to a review process by our manager research teams. From this pool of strategies, our portfolio construction teams select those strategies we believe fit our asset allocation goals and forward looking views in order to meet the portfolio’s investment objective.

As a general matter, we prefer J.P. Morgan managed strategies. We expect the proportion of J.P. Morgan managed strategies will be high (in fact, up to 100 percent) in strategies such as, for example, cash and high-quality fixed income, subject to applicable law and any account-specific considerations.

While our internally managed strategies generally align well with our forward looking views, and we are familiar with the investment processes as well as the risk and compliance philosophy of the firm, it is important to note that J.P. Morgan receives more overall fees when internally managed strategies are included. We offer the option of choosing to exclude J.P. Morgan managed strategies (other than cash and liquidity products) in certain portfolios.

INDEXES DEFINED:
The Russell 3000 Index is an unmanaged index which measures the performance of the 3,000 largest U.S. companies based on total market capitalization, which represents approximately 98% of the investable U.S. equity market. The performance of the index does not reflect the deduction of expenses associated with a fund, such as investment management fees. By contrast, the performance of the Fund reflects the deduction of the fund expenses, including sales charges if applicable. An investor cannot invest directly in an index. The Bloomberg Barclays U.S. Intermediate Aggregate Index is an unmanaged index comprised of U.S. government, mortgage, corporate and asset-backed securities with maturities of one to 10 years. The performance of the index does not reflect the deduction of expenses associated with a fund, such as investment management fees. By contrast, the performance of the Fund reflects the deduction of these expenses, including sales charges if applicable. An individual cannot invest directly in an index. The S&P 500 Index is an unmanaged index generally representative of the performance of large companies in the U.S. stock market. Index levels are in total return USD. The performance of the index does not reflect the deduction of expenses associated with a fund, such as management fees. By contrast, the performance of the Fund reflects the deduction of the fund expenses, including sales charges if applicable. An individual cannot invest directly in an index. Depending on a fund’s share class, there are different purchase minimums required to establish an account and to add to an account. The purchase minimum for I Class shares is $1,000,000. The fund prospectus states the applicable purchase minimums for each of the fund’s other share classes. Total return assumes reinvestment of dividends and capital gains distributions and reflects the deduction of any sales charges, where applicable. Performance may reflect the waiver of a portion of the Fund’s advisory or administrative fees for certain periods since the inception date. If fees had not been waived, performance would have been less favorable.

J.P. Morgan Funds are distributed by JPMorgan Distribution Services, Inc., which is an affiliate of JPMorgan Chase & Co. Affiliates of JPMorgan Chase & Co. receive fees for providing various services to the funds. JPMorgan Distribution Services, Inc. is a member of FINRA.

J.P. Morgan Asset Management is the marketing name for the asset management business of JPMorgan Chase & Co. and its affiliates worldwide.
