**IN BRIEF**

At a pivotal moment on a number of fronts—regulatory, interest rate and economic—around the globe, more investors are reassessing their short-term fixed income investment policy statement (cash IPS) and putting into place the strategies and solutions that can best help them navigate a changing environment. A cash IPS lets an organization define its short-term investment objectives and the strategies for achieving them. It creates a sound foundation and promotes consistent, long-term discipline in decision-making through all market conditions, so that crucial liquidity and investment goals may be met.

### How to develop a cash investment policy statement: Beginning the process

**Clarifying cash investment objectives**

An Objectives section of the cash IPS should define the organization’s goals for its short-term investment strategy. It should provide a high-level framework that clearly explains how the organization will meet each objective. While affirming cash investment objectives, the IPS should also retain enough flexibility and adaptability to take advantage of new market opportunities that may present themselves. The Objectives section may address:

- **CAPITAL PRESERVATION**  Protection of principal—the safety of cash investments—is likely to be a primary objective for many organizations.

- **SUFFICIENT LIQUIDITY**  The treasury group or financial staff can ascertain the liquidity level appropriate to steer clear of avoidable risks—a crucial goal.

- **YIELD/INCOME**  Providing consistent current income may be another goal, which will, however, need to be balanced with a probable increase in the volatility of principal.

- **TAX-ADVANTAGED RETURNS**  Tax-conscious liquidity management may be a goal, in which case tax-free short-term funds become an appropriate option.

- **ABOVE-BENCHMARK RETURNS**  Exceeding a benchmark that mirrors the portfolio’s underlying investments may be among the priority objectives.

### Cash segmentation

The well-established discipline of cash segmentation is an especially useful tool for short-term fixed income investors. Once a cash forecast is in place, an organization can segment its liquidity portfolio into three categories, reflecting their different liquidity needs and risk profiles (EXHIBIT 1): operating cash (requiring same-day liquidity), reserve cash (with an investment horizon of six to 12 months); and strategic cash (with an investment horizon of one year or longer).

Cash segmentation enables an organization to choose the most appropriate investment solution for each segment. (For more details, see “Put cash in its place: Leveraging the power of cash segmentation.” jpmgloballiquidity.com.)
