Prior to making any investment or financial decisions, an investor should seek individualized advice from a personal financial, legal, tax and other professional advisors that take into account all of the particular facts and circumstances of an investor's own situation.

**RISK SUMMARY**

The following risks could cause the Strategy's portfolio to lose money or perform more poorly than other investments.

Because this Strategy invests primarily in bonds, it is subject to interest rate risks. Bond prices generally fall when interest rates rise.

For some investors, income may be subject to the Alternative Minimum Tax. Capital gains, if any, are federally taxable. Income may be subject to state and local taxes.

Managed accounts are subject to market risks. Investment return and principal value will fluctuate so that when an account is liquidated, it may be worth more or less than the original value.

The securities highlighted have been selected based on their significance. They are not recommendation to buy or sell. Contact your financial professional for a complete list of firm recommendations in the Portfolio for the last year or to

assist you in evaluating your investment objective, and to make specific recommendations regarding your account. Representative portfolios and/or individual accounts may, or may not, hold the stocks mentioned above. Actual accounts will differ based on individual client account restrictions, investment guidelines, and account inception dates.

This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The view and strategies described may not be suitable for all investors.

**CREDIT QUALITY**

J.P. Morgan Investment Management (JPMIM) receives credit quality ratings on underlying securities of the portfolio from the three major ratings agencies - S&P, Moody's and Fitch. When calculating credit quality breakdown, JPMIM selects the middle rating of the agencies

when all three rate a security, the lower of two ratings if only two rate a security, and one rating if that is all that is provided. Securities that are not rated by all three agencies are reflected as such.

**INDEXES**

The Barclays 1-3 Year Government Index is comprised of U.S. Treasury and U.S. Agency issued securities with maturities of one to three years. The index includes US dollar-denominated, fixed-rate, nominal US Treasuries and US agency debentures (securities issued by US government owned or government sponsored entities, and debt explicitly guaranteed by the US government).

Managed Accounts have fees that reduce their performance; indexes do not. You cannot invest directly in an index.

*Past performance is no guarantee of future results.*

**PORTFOLIO ANALYSIS DEFINITIONS**

**Average Life:** The length of time the principal of a debt issue is expected to be outstanding.

**Duration:** Measures price sensitivity of fixed income securities to interest rate changes.
