Risk Summary

This investment is not a complete retirement program and may not provide sufficient retirement income.

There may be additional fees or expenses associated with investing in a Fund of Funds strategy.

The sample withdrawal amount is not expected to be level from year to year and instead will likely vary each year based upon changes in the underlying considerations noted above. In addition, the long-term risk and return target of the Fund in any given year, including any income earned by the Fund, is not designed to be equal to or greater than the sample spend down amount for such year and, if you choose to follow the sample spend down amount, redeeming shares will reduce your investment in the Fund. There is no assurance that the Adviser will meet its long term risk and return target and the sample spend down amount in any given year may be zero. Many of the assumptions and factors upon which the sample spend down amount will be based are the result of estimates and judgment calls by the Adviser. If those assumptions and factors are inaccurate or incomplete, the sample spend down amount may not accurately reflect the amount that a shareholder could redeem during the year while still allowing for redemptions in future years.

Shareholders should not consider the Fund as a complete solution for his or her investment or retirement income needs or as a guarantee of income. The sample spend down amount calculation assumes the reinvestment of dividends.

Asset allocation does not guarantee investment returns and does not eliminate the risk of loss.

Annual Operating Expenses

The Fund's adviser and/or its affiliates have contractually agreed to waive fees and/or reimburse expenses to the extent Total Annual Fund Operating Expenses (excluding acquired fund fees and expenses, dividend and interest expenses related to short sales, interest, taxes, expenses related to litigation and potential litigation and extraordinary expenses) exceed 0.270% of the average daily net assets. The Fund may invest in one or more money market funds advised by the adviser or its affiliates (affiliated money market funds). The Fund's adviser has contractually agreed to waive fees and/or reimburse expenses in an amount sufficient to offset the fees and expenses of the affiliated money market funds incurred by the Fund because of the Fund's investment in such money market funds. This waiver is in effect through 10/31/2025, at which time the adviser and/or its affiliates will determine whether to renew or revise it. The difference between net and gross fees includes all applicable fee waivers and expense reimbursements.

Conflicts of Interest

Refer to the Conflicts of Interest section of the Fund's Prospectus.

Target Date Funds

The JPMorgan SmartRetirement Funds are target date funds with the target date being the approximate date when investors plan to retire. Generally, the asset allocation of each Fund will change on an annual basis with the asset allocation becoming more conservative

Assuming investors consistently follow suggested withdrawal rates and reinvest distributions. The manager seeks to achieve the stated objectives. There can be no guarantee the objectives will be met.

Annual Sample Withdrawal Amount is a generic hypothetical example produced annually by the Fund's advisor and seeks to estimate a percentage of a shareholder's investment in the Fund as of the beginning of the year that theoretically could be redeemed by a shareholder during that year while still allowing for redemptions in future years through the maturity date. The amount attempts to balance income needs in the current year with the shareholder's longevity needs, i.e., the need for income in the future. The annual sample spend-down amount is adjusted annually and announced at the beginning of each calendar year, and is expected to vary year over year. Please see the Fund's prospectus for more detailed information.

as the Fund nears the target retirement date. The principal value of the Fund(s) is not guaranteed at any time, including at the target date.

Indexes

Mutual funds have fees that reduce their performance: indexes do not. You cannot invest directly in an index.

The S&P Target Date Index Series reflects exposure to various asset classes included in target date funds driven by a survey of such funds for each particular target date. These asset class exposures are represented by indices of securities in the index calculation. Prior to May 31, 2017 the asset class exposures were represented by ETFs net of fees. The Index returns are calculated on a daily basis.

The JPM SmartRetirement Blend 2020 Composite Benchmark is a customized benchmark of the following unmanaged market indexes: S&P 500 Index, S&P 400 Index, Russell 2000 Index, MSCI US REIT Index, MSCI EAFE Index (net total return), MSCI Emerging Markets Index (net total return), Bloomberg U.S. Aggregate Index, Bloomberg U.S. Treasury/Inflation Index: 1-10 Year Index, Bloomberg U.S. High Yield - 2% Issuer Cap Index, EMBI Global Diversified Index and FTSE 3-Month Treasury Bill Index. Each index is weighted to reflect the strategic asset class allocation of the JPM SmartRetirement Blend 2020 Fund and are adjusted over time to correspond to changes in the Fund's strategic asset class allocations. For performance commencing February 01, 2020 to August 31, 2021, the IA SBBI US 30 Day T-Bill TR USD Index represented the Money Market/Cash and Cash Equivalents component of the benchmark. For performance commencing February 1, 2020 to January 31, 2023, the Russell Midcap Index represented the U.S. Mid Cap Equity component of the benchmark. For periods prior to February 1, 2020, the composite benchmark was a weighted average of the benchmarks associated with the underlying funds in which the Fund invested in.

The benchmark shown represents the Fund's performance benchmark, which is different from the Fund's regulatory benchmark. The Fund's regulatory benchmark is the Bloomberg U.S. Aggregate Index and is included in the Fund's prospectus and/or shareholder report. This document can be obtained at www.jpmorganfunds.com.

Ratings and Awards

The Morningstar Medalist Rating™ is a summary expression of Morningstar's forward-looking analysis of investment strategies using a rating scale of Gold, Silver, Bronze, Neutral and Negative. Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with fees, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating assigned. Products are sorted by expected performance into rating groups defined by their Morningstar Category and their active or passive status. Analyst-covered products are assigned the three pillar ratings based on the analyst's qualitative assessment, subject to the Analyst Rating Committee's oversight, monitored and reevaluated at least every 14 months. Ratings are assigned monthly for vehicles covered either indirectly by analysts or by algorithm. For more detailed information including methodology, please go to global.morningstar.com/managerdisclosures.

Ratings and rankings should not be used as the sole basis in evaluating an investment product and should not be considered an offer or solicitation to buy or sell the investment product.
