Risk Summary

The manager seeks to achieve the stated objectives. There can be no guarantee the objectives will be met. Investing in these strategies carries a certain amount of risk. There can be no guarantee that investing in these strategies will prevent loss of an investment.

Investments in bonds and other debt securities will change in value based on changes in interest rates. If rates rise, the value of these investments generally drops. The Fund may invest in futures contracts and derivatives. Many derivatives create leverage that can cause the Fund to be more volatile than it would be if it had not used derivatives.
