

## Allocation Glide Path (%)

The strategic asset allocation depicts the Fund's targeted weights based on JPMorgan's internal analysis. The Fund's actual allocations may differ due to changes to these strategic allocations or due to tactical allocations.

### STRATEGIC ALLOCATION (%)

● Cash & Equivalents	0.0	● REITs	1.2
● Inflation Managed Fixed Income	1.5	● Emerging Markets Equity	5.4
● U.S. Fixed Income	34.5	● International Developed Equity	14.6
● High Yield	4.6	● U.S. Small Cap Equity	2.2
● Emerging Markets Debt	1.2	● U.S. Mid Cap Equity	4.1
		● U.S. Large Cap Equity	30.8

## Portfolio analysis

Number of holdings	15
Turnover ratio (trailing 12 months) (9/30/23) (%)	20.46

Due to rounding, values may not total 100%. The Fund's actual allocation may differ from the strategic allocation due to periodic tactical changes in the Fund's investments.

The Commingled Pension Trust Fund (SmartRetirement® Passive Blend 2030) of JPMorgan Chase Bank, N.A. is a collective trust fund established and maintained by JPMorgan Chase Bank, N.A. under a declaration of trust. The fund is not required to file a prospectus or registration statement with the SEC, and accordingly, neither is available. The fund is available only to certain qualified retirement and government plans and is not offered to the general public. Units of the fund are not bank deposits and are not insured or guaranteed by any bank, government entity, the FDIC or any other type of deposit insurance. You should carefully consider the investment objectives, risk, charges, and expenses of the fund before investing.

Morgan Asset Management, its affiliates or representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. Communications such as this are not impartial and are provided in connection with the advertising and marketing of products and services. Prior to making any investment or financial decisions, an investor should seek individualized advice from personal financial, legal, tax and other professionals that take into account all of the particular facts and circumstances of an investor's own situation.

### RISK SUMMARY

This investment is not a complete retirement program and may not provide sufficient retirement income.

The manager seeks to achieve the stated objectives. There can be no guarantee the objectives will be met. Investing in these strategies carries a certain amount of risk. There can be no guarantee that investing in these strategies will prevent loss of an investment.

To achieve its strategy, the Fund may invest in other underlying collective trust funds and exchange-traded funds, so the Fund's investment performance is directly related to the performance of the underlying funds. The investment objective of an underlying funds may differ from, and an underlying funds may have different risks than, the Fund. There is no assurance that the underlying funds will achieve their investment objectives. International investing involves increased risk and volatility due to possibilities of currency exchange rate volatility, political, social or economic instability, foreign taxation and differences in auditing and other financial standards. Investments in smaller companies may be riskier, less liquid, more volatile and more vulnerable to economic, market and industry changes than investment in larger, more established companies. Changes in the price of debt or equity issued by such companies may be more sudden or erratic than the prices of other securities, especially over the short term. Securities rated below investment grade are considered "high-yield," "non-investment grade," "below investment-grade," or "junk bonds." They generally are rated in the fifth or lower rating categories of Standard & Poor's and Moody's Investors Service. Although they can provide higher yields than higher rated securities, they can carry greater risk.

The underlying funds may use derivatives, which are instruments that have a value based on another instrument, exchange rate or index. In addition, the Fund may invest directly in derivatives. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic and market conditions and could result in losses that significantly exceed the Fund's or the underlying Funds' original investments. Many derivatives will give rise to a form of leverage. As a result, the Fund or an underlying fund may be more volatile than if the Fund or the underlying Fund had not been leveraged

because the leverage tends to exaggerate the effect of any increase or decrease in the value of the Fund's or the underlying Fund's portfolio securities. Derivatives are also subject to the risk that changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index. The use of derivatives for hedging or risk management purposes or to increase income or gain may not be successful, resulting in losses, and the cost of such strategies may reduce the Fund's or the underlying funds' returns. Derivatives also expose the Fund or the underlying funds to the credit risk of the derivative counterparty.

There may be additional fees or expenses associated with investing in a Fund of Funds strategy.

### TARGET DATE FUNDS

The JPMCB SmartRetirement Funds are target date funds with the target date being the approximate date when investors plan to start withdrawing their money. Generally, the asset allocation of each fund will change on an annual basis with the asset allocation becoming more conservative as the fund nears the target retirement date. The principal value of the fund(s) is not guaranteed at any time, including at the target date.

### INDEXES

The S&P Target Date Index Series reflects exposure to various asset classes included in target date funds driven by a survey of such funds for each particular target date. These asset class exposures are represented by indices of securities in the index calculation. Prior to May 31, 2017 the asset class exposures were represented by ETFs net of fees. The Index returns are calculated on a daily basis.

The JPMCB SmartRetirement Passive Blend 2030 Composite Benchmark is a customized benchmark of the following unmanaged market indexes: S&P 500 Index, S&P 400 Index, Russell 2000 Index, MSCI US REIT Index, MSCI EAFE Index (net total return), MSCI Emerging Markets Index (net total return), Bloomberg U.S. Aggregate Index, Bloomberg U.S. Treasury Inflation Notes: 1-10 Year Index, Bloomberg U.S. High Yield - 2% Issuer Cap Index, EMBI Global Diversified Index and FTSE 3-Month Treasury Bill Index. Each index is weighted to reflect the strategic asset class allocation of the JPMCB SmartRetirement Passive Blend 2030 Fund and are adjusted over time to correspond to changes in the Fund's strategic asset class allocations. For performance commencing February 01, 2020 to August 31, 2021, the IA SBB1 US 30 Day TBILL TR USD Index represented the Money Market/Cash and Cash Equivalents component of the benchmark. For performance commencing February 1, 2020 to January 31, 2023, the Russell Midcap Index represented the U.S. Mid Cap Equity component of the benchmark. For periods prior to February 1, 2020, the composite benchmark was a weighted average of the benchmarks associated with the underlying funds in which the Fund invested in.

Commingled funds have fees and expenses that reduce their performance: indexes do not. You cannot invest directly in an index.
