

JPMorgan Climate Change Solutions ETF

Ticker: TEMP

Designed by data, refined by research.

Combining artificial and human intelligence, Climate Change Solutions ETF invests in companies developing innovative climate change solutions.

Expertise

- Combines expertise in data science with the fundamental research of a 90-strong analyst team, with an average of 18 years of experience.

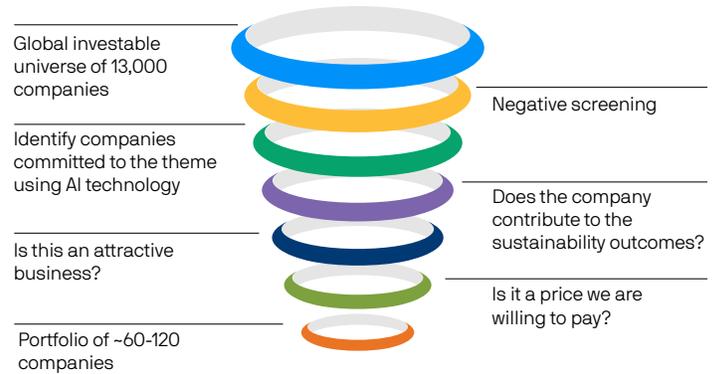

Portfolio

- Proprietary thematic engine uses natural language processing over a vast data set to identify companies committed to climate solutions.
- Fundamental active managers identify companies that are developing innovative solutions to address climate change.

Results

- An unconstrained portfolio of carefully selected companies leading the way in delivering climate change solutions.

Climate Change Solutions strategy

Rising to the climate challenge

Climate change is one of the biggest challenges society faces. Responding to climate change will require a meaningful investment in innovative climate solutions in order to provide clean energy across the entire globe. The shift toward climate change solutions has already started, and structural trends are driving the growth of climate change solutions.

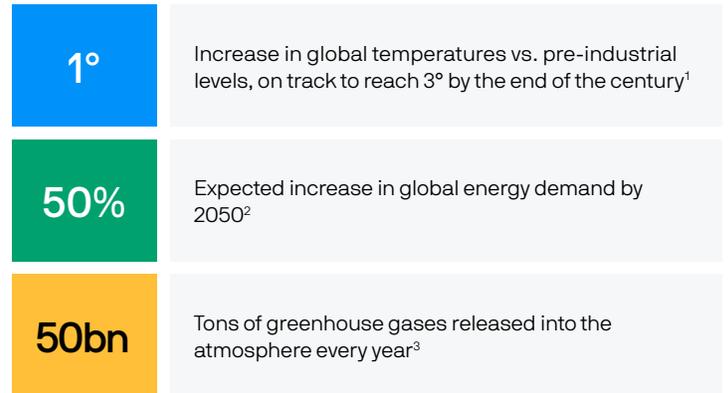

The Climate Change Solutions ETF invests in forward-thinking companies developing and scaling solutions to address the drivers of climate change, tapping into this wave of innovation while supporting a sustainable future for us all.

- Climate change insights and stewardship from dedicated Sustainable Investing Team.

Performance

Return (%)

	Total Return		Average Annual Return			
	3mos	YTD	1yr	3yrs	5yrs	Launch [^]
at NAV	-4.33	-31.74	-	-	-	-31.90 [^]
Market price returns	-4.26	-31.72	-	-	-	-31.67 [^]
Index	-6.82	-25.63	-	-	-	-24.11

Annual Expenses (%)

	Gross expense	Net expense
ETF Shares	0.49	0.49

The performance quoted is past performance and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than original cost. Current performance may be higher or lower than the performance data shown. For performance current to the most recent month-end please call 1-844-4JPM-ETF.

Index: MSCI ACWI Index (net total return)

Total Returns based on NAV and Market Price do not reflect brokerage commissions or sales charges in connection with the purchase or sale of Fund shares, which if included would lower the performance shown above. The NAV used in the Total Return calculation assumes all management fees and operating expenses incurred by the Fund.

^{*}The inception return is less than one year old, reflecting cumulative, not annualized, performance.

[^]Fund performance inception: 12/13/2021

YTD returns are as of the last business day of the month.

A fund's NAV is the sum of all its assets less any liabilities, divided by the number of shares outstanding.

Investors should carefully consider the investment objectives and risks as well as charges and expenses of the JPMorgan ETF before investing. The summary and full prospectuses contain this and other information about the ETF. Read the prospectus carefully before investing. Call 1-844-4JPM-ETF or visit www.jpmmorganETFs.com to obtain a prospectus.

This document is a general communication being provided for informational purposes only. It is educational in nature and not designed to be a recommendation for any specific investment product, strategy, plan feature or other purpose. Any examples used are generic, hypothetical and for illustration purposes only. Prior to making any investment or financial decisions, an investor should seek individualized advice from personal financial, legal, tax and other professionals that take into account all of the particular facts and circumstances of an investor's own situation.

This Fund integrates financially material Environmental, Social and Governance ("ESG") factors as part of its investment decision-making process ("ESG Integration"). ESG Integration is the systematic inclusion of ESG issues in investment analysis and investment decisions. ESG Integration for a Fund is dependent upon the availability of sufficient ESG information on the Fund's investment universe. ESG determinations may not be conclusive and securities of companies/issuers may be purchased and retained, without limit, by the adviser regardless of potential ESG impact. The impact of ESG Integration on a Fund's performance is not specifically measurable as investment decisions are discretionary regardless of ESG considerations.

Risk Summary

Climate change solutions strategies may result in investments that underperform the market. Such investments may be negatively impacted by changes in global and regional climates, environmental protection regulatory actions, changes in government standards and subsidy levels, changes in taxation and other domestic and international political, regulatory and economic developments. Because society's focus on climate change issues is relatively new, the emphasis and direction of governmental policies is subject to significant change, and rapid technological change could render even new approaches and products obsolete. There is a risk that the companies identified by the adviser do not operate as expected when addressing climate changes issues. In addition, there are significant differences in interpretations of what it means for a company to have solutions that address climate change.

Annual Operating Expenses

The Fund's management agreement provides that the adviser will pay substantially all expenses of the Fund, except for the management fees, payments under the Fund's 12b-1 plan (if any), interest expenses, dividend and interest expenses related to short sales, taxes, acquired fund fees and expenses (other than fees for funds advised by the adviser and/or its affiliates), costs of holding shareholder meetings, and litigation and potential litigation and other extraordinary expenses not incurred in the ordinary course of the Fund's business. The Fund shall be responsible for its non-operating expenses, including brokerage commissions and fees and expenses associated with the Fund's securities lending program, if applicable.

Indexes

ETFs have fees that reduce their performance: indexes do not. You cannot invest directly in an index.

The MSCI All Country World Index (net total return) is a free float-adjusted market capitalization weighted index that is designed to measure the performance of large- and mid- cap stocks in developed and emerging markets. Net total return figures assume the reinvestment of dividends after deduction of withholding tax, applying the maximum rate to nonresident individual investors who do not benefit from double taxation treaties.

Entities

J.P. Morgan ETFs are distributed by JPMorgan Distribution Services, Inc., which is an affiliate of JPMorgan Chase & Co. Affiliates of JPMorgan Chase & Co. receive fees for providing various services to the funds. JPMorgan Distribution Services, Inc. is a member of FINRA.
