

J.P. Morgan Short Duration High Yield Strategy

Separately Managed Account

Designed to provide a high level of income with lower volatility than the broad high yield market

APPROACH

- Invests in a diversified portfolio of high yield (below investment grade) corporate debt securities
- Focuses on higher quality, more liquid issues rated B/BB or better
- Seeks to maintain a duration of 1.5 to 3 years under most market conditions
- Combines bottom-up analysis with top-down insights, actively managing credit profile against market risk

EXPERTISE

Strategy manager(s) and years of experience
Christopher Musbach, 14 yrs

STRATEGY INFORMATION

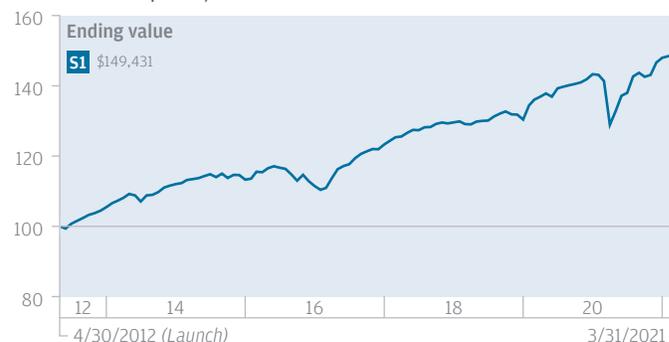

Launch date
Apr 30, 2012

PERFORMANCE

- S1** Strategy (gross of fees)

Yield to worst (%)	2.82	2.76

PERFORMANCE DISCLOSURES

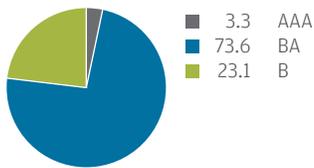

Past performance is not indicative of future returns. Returns will fluctuate and sell prices may be more or less than original cost. Net-of-fees returns are calculated by deducting the maximum managed account fee of 1.50%. Total returns include reinvestment of any income.

¹Supplemental to annual performance report.

The performance information shown prior to August 1, 2017 is that of the institutional composite. The investment objective and policies of the J.P. Morgan Short Duration High Yield Strategy separately managed account (SMA) are similar to other Short Duration High Yield strategy products advised by the adviser or its affiliates. However, the investment results of the SMA may be higher or lower than other Short Duration High Yield strategy products, and there is no guarantee that the investment results of the SMA will be comparable to any other of these Short Duration High Yield strategy products.

The above characteristics are from a representative portfolio. Actual account characteristics of individual accounts may be different. Portfolio characteristics are as of 3/31/2021 and are based on individual securities in the Portfolio on that date. Securities in the Portfolio are subject to change. Statistics shown are not indicative of future statistics and are not representative of future Portfolio performance.

Due to rounding, values may not total 100%.

This document is a general communication being provided for informational purposes only. It is educational in nature and not designed to be a recommendation for any specific investment product, strategy, plan feature or other purpose. Any examples used are generic, hypothetical and for illustration purposes only. Prior to making any investment or financial decisions, an investor should seek individualized advice from personal financial, legal, tax and other professionals that take into account all of the particular facts and circumstances of an investor's own situation.

RISK SUMMARY

The following risks could cause the Strategy's portfolio to lose money or perform more poorly than other investments.

Securities rated below investment grade are considered "high-yield," "non-investment grade," "below investment-grade," or "junk bonds." They generally are rated in the fifth or lower rating categories of Standard & Poor's and Moody's Investors Service. Although they can provide higher yields than higher rated securities, they can carry greater risk.

Investments in derivatives may be riskier than other types of investments. They may be more sensitive to changes in economic or market conditions than other types of investments. Derivatives may create leverage, which could lead to greater volatility and losses that significantly exceed the original investment.

Investments in bonds and other debt securities will change in value based on changes in interest rates. If rates rise, the value of these investments generally drops.

This material has been prepared for informational purposes only, and is not intended to provide, and should not be

relied on for, accounting, legal or tax advice. References to future returns are not promises or even estimates of actual returns a client portfolio may achieve. Any forecasts contained herein are for illustrative purposes only and are not to be relied upon as advice or interpreted as a recommendation.

Opinions and estimates offered constitute our judgment and are subject to change without notice, as are statements of financial market trends, which are based on current market conditions. We believe the information provided here is reliable, but do not warrant its accuracy or completeness.

This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The view and strategies described may not be suitable for all investors.

CREDIT QUALITY

J.P. Morgan Investment Management (JPMIM) receives credit quality ratings on underlying securities of the portfolio from the three major ratings agencies – S&P, Moody's and Fitch. When calculating credit quality breakdown, JPMIM selects the middle rating of the agencies when all three rate a security, the lower of two ratings if only two rate a security, and one rating if that is all that is provided. Securities that are not rated by all three agencies are reflected as such.

INDEXES

Managed Accounts have fees that reduce their performance; indexes do not. You cannot invest directly in an index.

The High Yield Short Duration Blended Benchmark includes BofA ML 1-5 Yr US Cash Pay HY Constrained Index from

04/30/12 - 07/31/17 and Bloomberg Barclays US HY 2% CCCs 1-5 yrs SEC from 08/01/17 to present.

Past performance is no guarantee of future results.

PORTFOLIO ANALYSIS DEFINITIONS

Option-adjusted spread (OAS) is the spread relative to a risk-free interest rate, usually measured in basis points, that equates the theoretical present value of a series of uncertain cash flows of an instrument to its current market price. OAS can be viewed as the compensation an investor receives for assuming a variety of risks (e.g. liquidity premium, default risk, model risk), net of the cost of any embedded options.

Duration: Measures price sensitivity of fixed income securities to interest rate changes.

Average Life: The length of time the principal of a debt issue is expected to be outstanding.
