| Cash Equivalent         | 5.07  | —         |

\*Due to rounding, values may not total 100%.

#### RISKS ASSOCIATED WITH INVESTING IN THE FUND:

Investments in bonds and other debt securities will change in value based on changes in interest rates. If rates rise, the value of these investments generally drops. For some investors, income may be subject to the Alternative Minimum Tax. Capital gains, if any, are federally taxable. Income may be subject to state and local taxes. Investments that are concentrated in a single industry, region, or issuer do not represent a complete investment program and may lead to a higher degree of market risk.

#### RETURNS:

<sup>1</sup>The quoted performance of the Fund includes performance of a predecessor fund/share class prior to the Fund's commencement of operations. Please refer to the current prospectus for further information.

**30-day SEC Yield:** Represents net investment income earned by a fund over a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the 30-day period. The 30-day yield should be regarded as an estimate of investment income and may not equal the fund's actual income distribution rate.

**30-day SEC Yield (unsubsidized):** Unsubsidized yield does not adjust for any fee waivers and/or expense reimbursements.

#### ANNUAL OPERATING EXPENSES:

The Fund's adviser and/or its affiliates have contractually agreed to waive fees and/or reimburse expenses to the extent Total Annual Fund Operating Expenses (excluding acquired fund fees and expenses, dividend and interest expenses related to short sales, interest, taxes, expenses related to litigation and potential litigation and extraordinary expenses) exceed 0.550% for A Shares, 0.350% for R6 Shares, 1.050% for C Shares and 0.450% for I Shares of the average daily net assets. The Fund may invest in one or more money market funds advised by the adviser or its affiliates (affiliated money market funds). The Fund's adviser has contractually agreed to waive fees and/or reimburse expenses in an amount sufficient to offset the fees and expenses of the affiliated money market funds incurred by the Fund because of the Fund's investment in such money market funds. This waiver is in effect through 6/30/2024 for A Shares, 6/30/2024 for R6 Shares, 6/30/2024 for C Shares and 6/30/2024 for I Shares, at which time the adviser and/or its affiliates will determine whether to renew or revise it. The difference between net and gross fees includes all applicable fee waivers and expense reimbursements.

#### PORTFOLIO STATISTICS:

**Average coupon:** A calculation of the total interest cost for a bond issue expressed as a percentage.

**Average life:** The length of time the principal of a debt issue is expected to be outstanding.

**Average Maturity:** The average length of maturity for all fixed-rate debt instruments held in a portfolio. A bond fund or mutual fund with a long average maturity is more sensitive to interest rate fluctuations than one with shorter average maturity.

**Average Price:** The average price of a bond is calculated by adding its face value to the price paid for it and dividing the sum by two. The average price is sometimes used in determining a bond's yield to maturity where the average price replaces the purchase price in the yield to maturity calculation.

**Duration:** Measures price sensitivity of fixed income securities to interest rate changes.

**Effective Duration:** A calculation used to approximate the actual, modified duration of a callable bond. It takes into account the fact that future interest rate changes will affect the expected cash flows for a callable bond.

**Yield to maturity (YTM):** is the estimated total return anticipated on a bond or other obligation if the obligation is held until maturity and if all payments are made as scheduled.

**Yield to worst:** An estimate of the lowest yield that you can expect to earn from a callable bond when holding to maturity, absent a default.

#### QUALITY DISTRIBUTION:

The manager uses credit quality ratings on underlying securities of the portfolio from three major ratings agencies - S&P, Moody's and Fitch. When calculating the credit quality breakdown, the manager selects the middle rating of the agencies when all three agencies rate a security. The manager will use the lower of the two ratings if only two agencies rate a security and will use one rating if that is all that is provided. Securities that are not rated by any of the three agencies are reflected as not rated.

#### INDEXES DEFINED:

Mutual funds have fees that reduce their performance: indexes do not. You cannot invest directly in an index.

The Bloomberg New York Intermediate (1-17 Year) Maturities Index represents the performance of New York municipal bonds with maturities from 1 to 17 years.

#### NEGATIVE CASH BALANCES:

When a negative cash balance is reported, this represents an unsettled trade as of the previous month end.

**Contact JPMorgan Distribution Services, Inc. at 1-800-480-4111 for a fund prospectus. You can also visit us at [www.jpmorganfunds.com](http://www.jpmorganfunds.com). Investors should carefully consider the investment objectives and risks as well as charges and expenses of the mutual fund before investing. The prospectus contains this and other information about the mutual fund. Read the prospectus carefully before investing.**

Total return figures (for the fund and any index quoted) assume payment of fees and reinvestment of dividends (after the highest applicable foreign withholding tax) and distributions. Without fee waivers, fund returns would have been lower. Due to rounding, some values may not total 100%.

J.P. Morgan Funds are distributed by JPMorgan Distribution Services, Inc., which is an affiliate of JPMorgan Chase & Co. Affiliates of JPMorgan Chase & Co. receive fees for providing various services to the funds. JPMorgan Distribution Services, Inc. is a member of FINRA.
