RISKS ASSOCIATED WITH INVESTING IN THE FUND:

Investments in bonds and other debt securities will change in value based on changes in interest rates. If rates rise, the value of these investments generally drops.

For some investors, income may be subject to the Alternative Minimum Tax. Capital gains, if any, are federally taxable. Income may be subject to state and local taxes.

Investments in derivatives may be riskier than other types of investments. They may be more sensitive to changes in economic or market conditions than other types of investments. Derivatives may create leverage, which could lead to greater volatility and losses that significantly exceed the original investment.

The value of investments in mortgage-related and asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. The securities may decline in value, face valuation difficulties, become more volatile and/or become illiquid. They are also subject to prepayment risk, which occurs when mortgage holders refinance or otherwise repay their loans sooner than expected, creating an early return of principal to holders of the loans.

Income from investments in municipal securities is exempt from federal income tax. The risk of a municipal obligation generally depends on the financial and credit status of the issuer.

RETURNS:

30-day SEC Yield: Represents net investment income earned by a fund over a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the 30-day period. The 30-day yield should be regarded as an estimate of investment income and may not equal the fund's actual income distribution rate.

30-day SEC Yield (unsubsidized): Unsubsidized yield does not adjust for any fee waivers and/or expense reimbursements.

ANNUAL OPERATING EXPENSES:

The Fund's adviser and/or its affiliates have contractually agreed to waive fees and/or reimburse expenses to the extent Total Annual Fund Operating Expenses (excluding acquired fund fees and expenses, dividend and interest expenses related to short sales, interest, taxes, expenses related to litigation and potential litigation and extraordinary expenses) exceed 0.380% for A Shares and 0.180% for I Shares of the average daily net assets. The Fund may invest in one or more money market funds advised by the adviser or its affiliates (affiliated money market funds). The Fund's adviser has contractually agreed to waive fees and/or reimburse expenses in an amount sufficient to offset the fees and expenses of the affiliated money market funds incurred by the Fund because of the Fund's investment in such money market funds. This waiver is in effect through 6/30/2026 for A Shares and 6/30/2026 for I Shares, at which time the adviser and/or its affiliates will determine whether to renew or revise it. The difference between net and gross fees includes all applicable fee waivers and expense reimbursements.

PORTFOLIO STATISTICS:

Average coupon: A calculation of the total interest cost for a bond issue expressed as a percentage.

Average Life: The length of time the principal of a debt issue is expected to be outstanding.

Average maturity: The average length of maturity for all fixed-rate debt instruments held in a portfolio. A bond fund or mutual fund with a long average maturity is more sensitive to interest rate fluctuations than one with shorter average maturity.

Average price: The average price of a bond is calculated by adding its face value to the price paid for it and dividing the sum by two. The average price is sometimes used in determining a bond's yield to maturity where the average price replaces the purchase price in the yield to maturity calculation.

Duration: Measures price sensitivity of fixed income securities to interest rate changes.

Yield to maturity (YTM): is the estimated total return anticipated on a bond or other obligation if the obligation is held until maturity and if all payments are made as scheduled.

Gross YTM is calculated by averaging the YTM of each obligation held in the portfolio (including, if any, convertible bonds, preferred securities and derivatives) on a market weighted basis without the deduction of fees and expenses. Unlike SEC Yield, Gross YTM is a representation of the estimated total return of the bonds and other obligations held in the portfolio as of the month-end shown, whereas SEC Yield approximates the current income generated by the obligations held in the portfolio over a historical 30-day period after the deduction of fees and expenses. Unlike SEC Yield, Gross YTM takes into account derivatives. **Gross YTM and SEC Yield are not a guarantee nor necessarily indicative of future performance or income generation.**

Net YTM is calculated in the same way as Gross YTM except that Net YTM reflects the deduction of fund-level fees and expenses. **Net YTM is not a guarantee nor necessarily indicative of future performance or income generation.**

Yield to worst (YTW) is the lower of a bond or other obligation's yield to maturity (YTM) and yield to call (YTC). **Gross YTW** is calculated by averaging the YTW of each obligation held in the portfolio on a market weighted basis without the deduction of fees and expenses. YTM is calculated as described next to the YTM figures. YTC is calculated the same way as YTM, but assumes that a bond or other obligation will be called or repurchased by the issuer before its maturity date (generally the next call date), and that the portfolio will be paid a call price (generally a percentage of the then-current face value of the obligation) on the call date. Gross YTW, YTM and YTC are not a guarantee nor necessarily indicative of future performance or income generation.

Certain other funds may calculate YTM differently (e.g., certain other funds may include only certain types of derivatives in the calculation of YTM, whereas the YTM calculation for this fund includes all types of derivatives), and such differences could significantly impact the calculation of YTM, and therefore decrease comparability between YTM for this fund and YTM for other funds.

QUALITY DISTRIBUTION:

The manager uses credit quality ratings on underlying securities of the portfolio from three major ratings agencies - S&P, Moody's and Fitch. When calculating the credit quality breakdown, the manager selects the middle rating of the agencies when all three agencies rate a security. The manager will use the lower of the two ratings if only two agencies rate a security and will use one rating if that is all that is provided. Securities that are not rated by any of the three agencies are reflected as not rated.

INDEXES DEFINED:

Mutual funds have fees that reduce their performance: indexes do not. You cannot invest directly in an index.

The benchmark shown represents the Fund's performance benchmark, which is different from the Fund's regulatory benchmark. The Fund's regulatory benchmark is the Bloomberg US Municipal Index and is included in the Fund's prospectus and/or shareholder report. This document can be obtained at www.jpmorganfunds.com.

The Bloomberg 1 Year Municipal Bond Index is an unmanaged index that includes bonds with a minimum credit rating of BAA3, are issued as part of a deal of at least \$50 million, have an amount outstanding of at least \$5 million, and have maturities of 1 to 2 years. The performance of the index does not reflect the deduction of expenses associated with a mutual fund, such as investment management fees. By contrast, the performance of the Fund reflects the deduction of the mutual fund expenses, including sales charges if applicable. An individual cannot invest directly in an index.

NEGATIVE CASH BALANCES:

When a negative cash balance is reported, this represents an unsettled trade as of the previous month end.

Contact JPMorgan Distribution Services, Inc. at 1-800-480-4111 for a fund prospectus. You can also visit us at www.jpmorganfunds.com. Investors should carefully consider the investment objectives and risks as well as charges and expenses of the mutual fund before investing. The prospectus contains this and other information about the mutual fund. Read the prospectus carefully before investing.

Total return figures (for the fund and any index quoted) assume payment of fees and reinvestment of dividends (after the highest applicable foreign withholding tax) and distributions. Without fee waivers, fund returns would have been lower. Due to rounding, some values may not total 100%.

J.P. Morgan Funds are distributed by JPMorgan Distribution Services, Inc., which is an affiliate of JPMorgan Chase & Co. Affiliates of JPMorgan Chase & Co. receive fees for providing various services to the funds. JPMorgan Distribution Services, Inc. is a member of FINRA.

J.P. Morgan Asset Management is the brand name for the asset management business of JPMorgan Chase & Co and its affiliates worldwide.
