Portfolio Breakdown

Key Risks

It is important to understand that the value of investments may rise or fall, investment returns are not guaranteed and it is possible that investors may lose their money. The appropriate level of risk for each person depends on a range of factors, including age, investment timeframe and the investor's risk profile. For more detailed information relating to the risks of the Fund, please refer to the relevant Product Disclosure Statement and Target Market Determination available on the [website](#).

1 The information in this table relates to holdings of the underlying ETF.

General Disclosures

Before investing, obtain and review the Product Disclosure Statement of the Fund and Target Market Determination which have been issued by Perpetual Trust Services Limited, ABN 48 000 142 049, AFSL 236648, as the responsible entity of the fund available on <https://am.jpmorgan.com/au> to understand the various risks associated with investing in the Fund and in making any investment decision. Past performance is not a reliable indicator of future performance and investors may not get back the full amount invested. Future performance and return of capital is not guaranteed. Information is considered correct at the time of issue but no liability for errors or omissions will be accepted by JPMorgan Asset Management (Australia) Limited or its affiliates. This document is intended solely for the person to whom it is provided by the issuer. Positive yield does not imply positive returns. Yields are not guaranteed. Fund holdings and performance are likely to have changed since the report date. No provider of information presented here, including index and ratings information, is liable for damages or losses of any type arising from use of their information.

Information from communications with you will be recorded, monitored, collected, stored and processed consistent with our Australian Privacy Policy available at <https://am.jpmorgan.com/global/privacy>. The yield displayed is in the base currency of the Fund. Actual share class yields may differ from the displayed yield due to currency effects. Maturity Date refers to the maturity/reset date of the security. For those securities whose reference coupon rate is adjusted at least every 397 days, the date of the next coupon rate adjustment is shown. This document does not take into account any specific investor's objectives, financial situation or needs. Investors should seek financial advice, refer to offering documents including risk factors and make independent evaluation before investing. Past performance is not a guide to current or future results. Please refer to fund's offering documents for details relating to risk factors, fees and expenses, distribution policy.

Information Sources

Fund information, including performance calculations and other data, is provided by J.P. Morgan Asset Management (the marketing name for the asset management businesses of JPMorgan Chase & Co and its affiliates worldwide). All data is as at the document date unless indicated otherwise. Benchmark Source: MSCI. Neither MSCI nor any other third party involved in or related to compiling, computing or creating the MSCI data (the "MSCI Parties") makes any express or implied warranties or representations with respect to such data (or the results to be obtained by use thereof), and the MSCI Parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to such data. Without limiting any of the foregoing, in no event shall any of the MSCI Parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. All equity indices stated as 'Net' are calculated net of tax as per the standard published approach by the index vendor unless stated otherwise.

Definitions

Distribution Yield: The Distribution Yield represents the annualised yield of the most recently declared distribution including any special income distribution. Once more than 12 months of distribution data are available, the 12-month Rolling Distribution Yield will be calculated and made available. Prior to 12 months, the annualised Distribution Yield is displayed. Distribution yield (annualised) is calculated by dividing the distribution per share by the net asset value per share as of the relevant ex-distribution date and indexing it by the number of compounding periods in the year. 12-month Rolling Distribution Yield: The 12-month Rolling Distribution Yield is calculated by aggregating the sum of the distribution yield (non-annualised) for the most recent regularly declared income distributions over the last 12 months as well as any special income distributions in the intervening period. Distribution yield (non-annualised) is calculated by dividing the distribution per share by the net asset value per share as of the relevant ex-distribution date. Please refer to offering documents for details on distribution policy.
