

Important Information

1. The Fund invests in a diversified portfolio of income-producing equities, bonds and other securities. The Fund will primarily invest (at least 70%) in debt and equity securities. The Fund will have limited RMB denominated underlying investments.
2. The Fund is therefore exposed to a range of investment related risks which includes risk related to dynamic asset allocation strategy, debt securities (including investment grade bond risks, below investment grade/unrated invest risk, credit risk, interest rate risk, sovereign debt risk and valuation risk), asset backed securities, mortgage backed securities, collateralised loan obligations and asset backed commercial papers, equity, real estate market (associated with the risk of investing in REITs and other property related securities; direct investment in real estate is not permitted), emerging markets, concentration, currency, derivatives, liquidity, hedging, class currency, currency hedged classes and Eurozone sovereign debt crisis. For RMB hedged class, risks associated with the RMB currency and currency hedged classes risks. RMB is currently not freely convertible and RMB convertibility from offshore RMB (CNH) to onshore RMB (CNY) is a managed currency process subject to foreign exchange control policies of and restrictions imposed by the Chinese government. There can be no assurance that RMB will not be subject to devaluation at some point. The Manager may, under extreme market conditions when there is not sufficient RMB for currency conversion and with the approval of the Trustee, pay redemption monies and/or distributions in USD.
3. Where the income generated by the Fund is insufficient to pay a distribution as the Fund declares, the Manager may at its discretion determine such distributions may be paid from capital including realised and unrealised capital gains. Investors should note that the payment of distributions out of capital represents a return or withdrawal of part of the amount they originally invested or from any capital gains attributable to that original investment. Any payments of distributions by the Fund may result in an immediate decrease in the net asset value per unit. Also, a positive distribution yield does not imply a positive return on the total investment.
4. Investors may be subject to substantial losses.
5. Investors should not solely rely on this document to make any investment decision.

The Fund's performance after different periods of drawdowns*

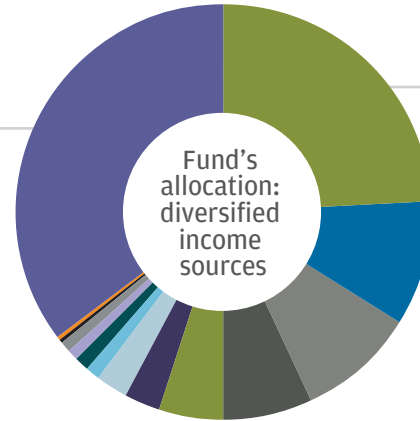

Diversification does not guarantee investment returns and does not eliminate the risk of loss. ^o Issued by The Asset, 2019 award, reflecting performance of previous calendar year. [^] Source: J.P. Morgan Asset Management, Moody's, S&P, Fitch, Kroll, Morningstar, as of end-December 2021. The credit rating is based on the highest of different rating agencies. Average rating is the weighted average of the credit ratings of bond holdings (including non-rated bonds), excluding preferreds, perpetuals, convertibles and net liquidity. * Different periods of drawdowns: European Debt Crisis from 16.09.2011 to 04.10.2011; Taper Tantrum from 08.05.2013 to 24.06.2013; Crimea Crisis from 04.09.2014 to 16.10.2014; Chinese Stock Turbulence from 27.04.2015 to 29.09.2015 (leg 1) and 11.02.2016 (leg 2); US-China Trade Tensions from 24.01.2018 to 27.12.2018; COVID-19 from 05.03.2020 to 23.03.2020. Source: J.P. Morgan Asset Management, as of 31.12.2021. USD (mth) class return, NAV to NAV in USD with income reinvested. Calendar year return: 2016 +7.4%; 2017 +10.6%; 2018 -5.0%; 2019 +14.8%; 2020 +4.7%; 2021 YTD +9.1%. Past performance is not indicative of future performance. The "(mth)" class aims at monthly distribution. Dividend rate is not guaranteed. Distributions may be paid from capital. Refer to important information 3

JPMorgan Multi Income Fund

In focus: High-dividend equities♦

- Our equity allocation is favourably positioned for a continuation of the market rotation towards higher dividend paying stocks, which are currently trading at large discounts relative to growth stocks
- Historically, such periods have resulted in strong total and relative returns over the subsequent 12 months
- Above-trend global growth is set to persist in 2022, with the booming economy delivering powerful tailwind to dividend stocks

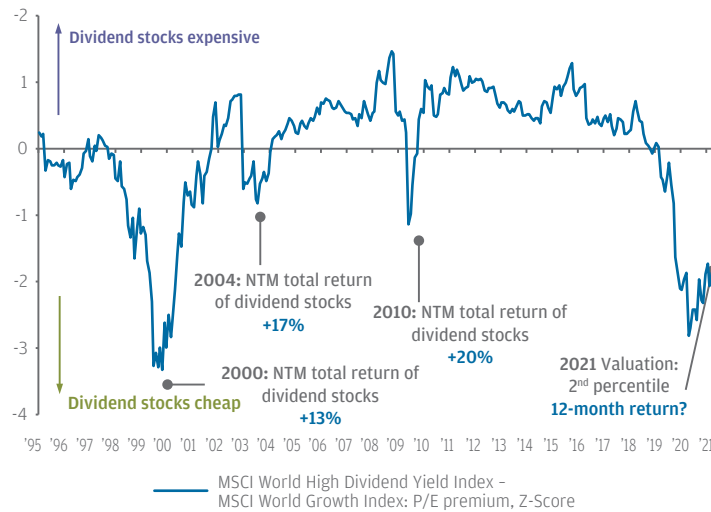

- 35.3% Global Equities
- 24.4% High Yield Bonds
- 9.5% Preferreds / Perpetuals
- 9.4% Covered Call Notes
- 6.8% Non-Agency Securitized
- 5.1% REITs
- 2.6% Asia High Yield
- 2.5% Global Infrastructure Equities
- 1.2% Net Liquidity
- 1.1% US Inv Grade Fixed Income
- 0.9% Emerging Market Debt
- 0.8% Convertible Bonds
- 0.3% Global Government Bond
- 0.1% Short Duration Fixed Income

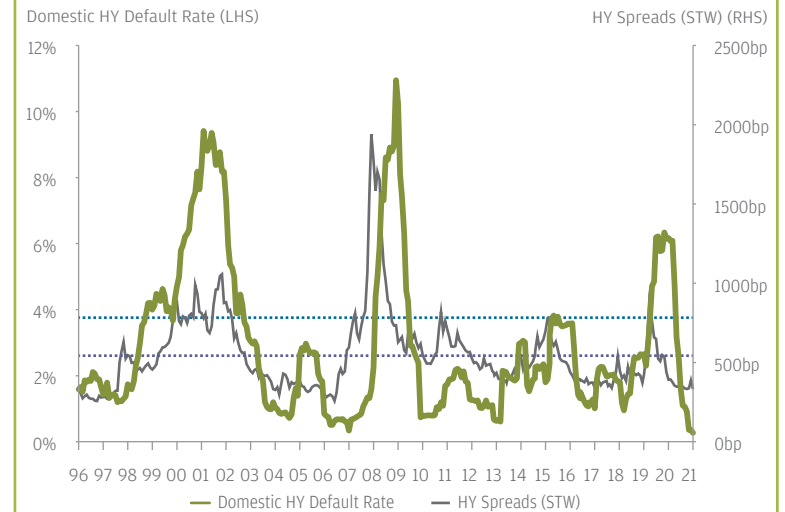

In focus: High-yield (HY) bonds#

- HY bonds continue to be supported by strong fundamentals and low defaults on the back of improving corporate balance sheets and earnings
- In US HY, the trailing 12-month par-weighted default rate decreased to 0.27% - the lowest-ever rate in HY history following 2020's pull forward in defaults
- HY spreads offer attractive compensation relative to expected defaults and remain a core component of our income portfolio

P/E: high dividend stocks vs. growth stocks♦

Defaults slowed dramatically in recent months#

IG: investment grade. NTM: next twelve months. REITs: real estate investment trust. Indices do not include any fees or operating expenses and are not available for actual investment. The opinions and views expressed here are those held by the author as at the date of this document, which are subject to change and are not to be taken as or construed as investment advice. The Fund is an actively managed portfolio; holdings, sector weights, allocations and leverage, as applicable are subject to change at the discretion of the Investment Manager without notice. For illustrative purposes only based on current market conditions, subject to change from time to time. Not all investments are suitable for all investors. Exact allocation of portfolio depends on each individual's circumstances and market conditions.

♦ Source: Bloomberg, J.P. Morgan Asset Management, as of end-December 2021. All indices in local currency: MSCI World Growth Index, MSCI World High Dividend Yield Index. P/E = Trailing 12-month price-to-earnings ratio. Z-score is measured in terms of standard deviations from the mean.

It refers to corporate bonds which are given ratings below investment grade and are deemed to have a higher risk of default. For illustrative purposes only, exact allocation of portfolio depends on each individual's circumstances and market conditions. Yield is not guaranteed. Positive yield does not imply positive return. Source: JPMorgan Chase & Co., as of end-December 2021. STW refers to spread to worst. Index used: ICE BofAML US High Yield Constrained Index.
