J.P.Morgan
ASSET MANAGEMENT

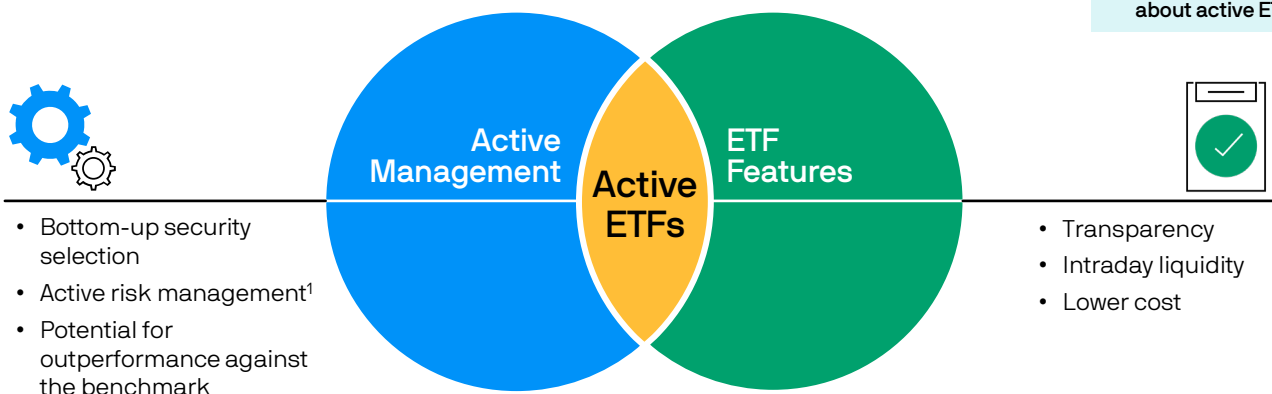

What are Active ETFs?

Active ETFs combine the trading convenience and potential cost savings of ETFs, with the expertise of portfolio managers and research analysts. Active management also provides flexibility in seeking returns and managing risks.

Read our "Guide to ETFs" to learn more about active ETFs

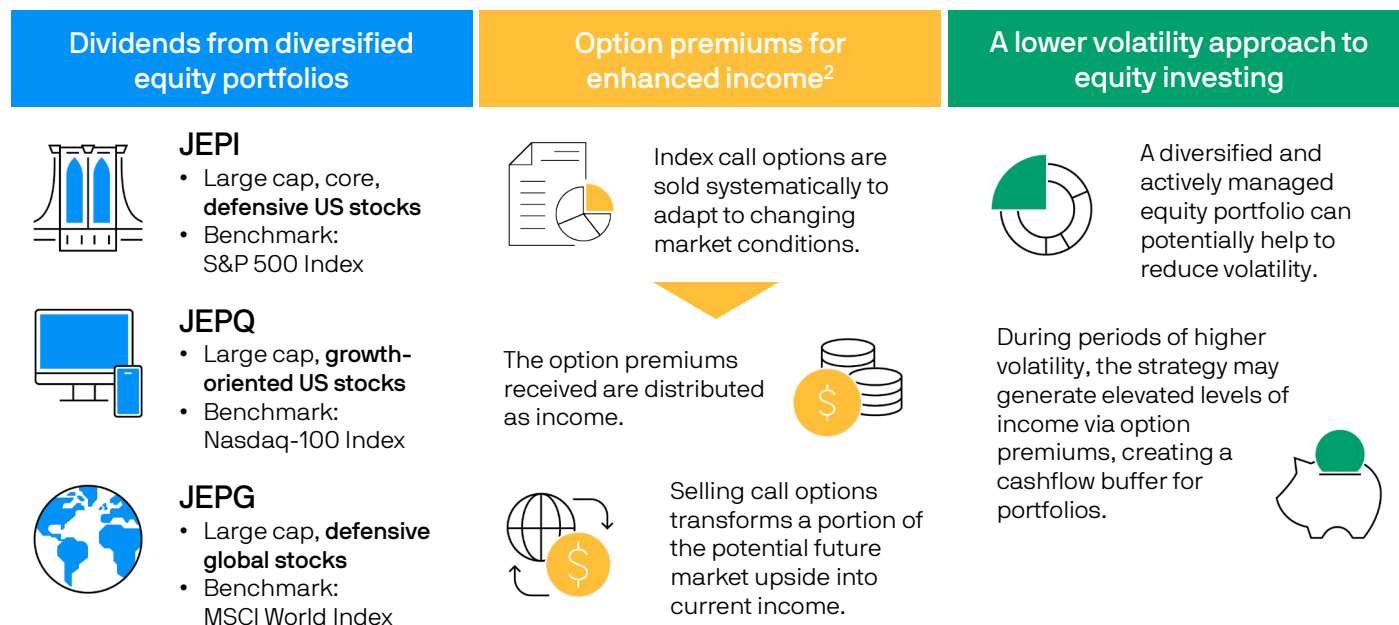

Combining the merits of two worlds

How does the Equity Premium Income strategy work?

Our Equity Premium Income strategy generates income through:

- Dividends from diversified and actively managed equity portfolios and
- Premiums from selling index call options².

Source: J.P. Morgan Asset Management.

Provided to illustrate asset class trends, features and characteristics; not to be construed as offer, research or investment advice. Diversification does not guarantee investment return and does not eliminate the risk of loss. The manager seeks to achieve the stated objectives. There can be no guarantee the objectives will be met.

(1) Active risk management process includes an effort to monitor and manage risk but does not imply elimination of risk.

(2) Call option writing (selling call options) generates income in the form of option premiums. There is a potential to forego some capital appreciation as a result of writing call options. Estimated income is not guaranteed and does not imply positive return.

Our Equity Premium Income Active ETF suite

This is the UCITS version of the largest active ETF in the world³.

(3) Source: Bloomberg. Based on asset under management as of 31.07.2025. Assets under management and ranking are based on Bloomberg’s definition of active ETF.

(4) These portfolios are actively managed. Holdings, sector weights, allocations and leverage, as applicable, are subject to change at the discretion of the investment manager without notice. Diversification does not guarantee investment return and does not eliminate the risk of loss.

(5) Income paid out monthly for the (dist) share class. Dividend payments are not guaranteed and are made at the manager’s discretion.

(6) There is no guarantee that companies that can issue dividends will declare, continue to pay, or increase dividends.

(7) Market participation is any capital appreciation/depreciation less the forgone upside. There is a potential to forego some capital appreciation as a result of writing call options. Estimated income is not guaranteed and does not imply positive return.

A useful addition to portfolios

Active at the cost of passive

A cost-effective avenue to gain exposure to a diversified, actively managed, lower risk equity portfolio.

Consistent income

Consistent stream of monthly income from dividends and option premiums may **help buffer portfolios during volatile periods and enhance total return in range-bound markets.**

An income diversifier

With minimal exposure to duration or credit risks, these ETFs **may help diversify income streams** beyond traditional income-yielding products.
