Currency hedging for UCITS ETFs at J.P. Morgan Asset Management

Overview

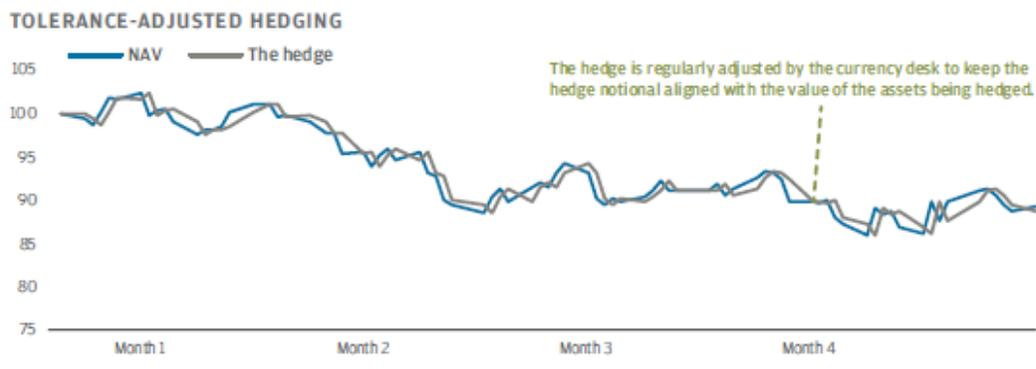

- JPMAM* offers currency-hedged share classes for several of its UCITS ETFs to help investors mitigate the impact of foreign exchange movements on their investment returns

Methodology

- JPMAM uses a tolerance-adjusted hedging approach for our ETF currency-hedged share classes
- Hedges are reset whenever the hedge ratio breaches a pre-set threshold
- Seeks to provide an accurate currency hedge for ETF investors without incurring excessive transaction costs
- JPMAM assesses each ETF, including its constituents, to determine an appropriate tolerance level, balancing tracking error and transaction costs
- It also reduces the risk that any large unadjusted over-hedged or under-hedged position affects the performance of the currency-hedged share class¹

Ring-fenced charges

- The costs and expenses incurred in the hedging process are ring-fenced and only borne by investors in the currency-hedged share classes
- JPMAM charges the same Total Expense Ratio for hedged and unhedged share classes

Source: J.P. Morgan Asset Management. For illustrative purposes only.

¹ As a result, performance may be different from many ETF monthly-hedged benchmarks, where hedges are typically only reset once each month

*JPMAM refers to J.P. Morgan Asset Management (JPMAM) is the brand name of the global group of asset management companies belonging to JPMorgan Chase & Co. (JPMC). JPMC is the ultimate parent company of the investment companies that make up JPMAM. The acronym "ETF" stands for Exchange Traded Fund.

Investment Objective and Risk Profile

JPMorgan ETFs (Ireland) ICAV - BetaBuilders EUR Govt Bond UCITS ETF *

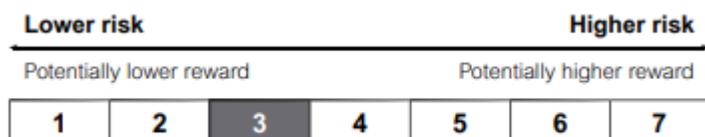

Investment objective

The Fund aims to provide an exposure to the performance of Euro-denominated bonds that have been issued by governments of Eurozone countries.

Risk Profile

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded.
- The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- The Fund may be concentrated geographically. As a result, the Fund may be more volatile than more broadly diversified funds.
- Further information about risks can be found in the "Risk Information" section of the Prospectus.
