ASSET MANAGEMENT

Why invest in the Ultra-Short Income ETFs?

Built on the foundations of Global Liquidity

ETFs are just a wrapper

The only thing that is new is the vehicle type – leveraging same \$105 billion¹ Ultra-Short Duration Strategy

Core Complement Strategy

Ultra Short Duration is the ‘goldilocks’ strategy

Reducing credit risk and interest rate risk versus Fixed Income
Seeking higher income than a liquidity product (+40-60bps)

Active

We only buy what we like

Not forced to hold benchmark bonds

Liquid

We can get out when we want

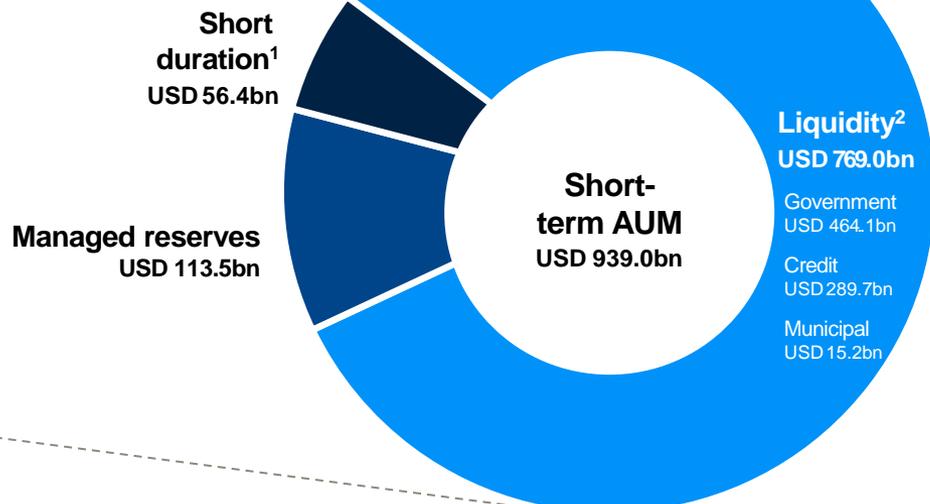

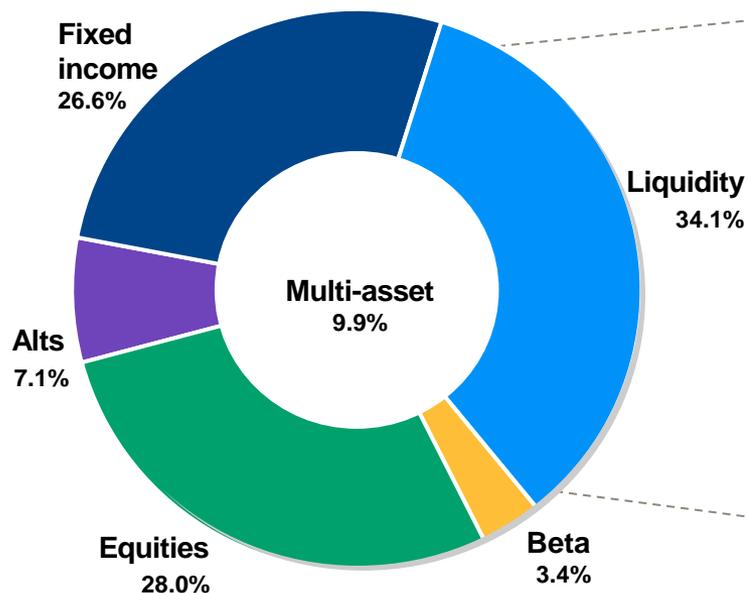

Laddered portfolio and access to the \$5.21trn* large Money Market Fund global universe

Source: *ICI Money Market Fund Assets as at 21-Apr-23, Bloomberg. ¹The \$105 billion Ultra-Short Duration AuM is as of 30-Dec-22. These targets are the investment manager’s internal guidelines only to achieve the fund’s investment objectives and policies as stated in the prospectus. The targets are gross of fees and subject to change. There is no guarantee that these targets will be met.

Strengthening your short-term views with our deep knowledge of cash investing

Short-term fixed income is a primary focus for J.P. Morgan Asset Management

Total Asset Management AUM: USD 2.59 trillion

J.P. Morgan expertise spans the full spectrum of investment horizons

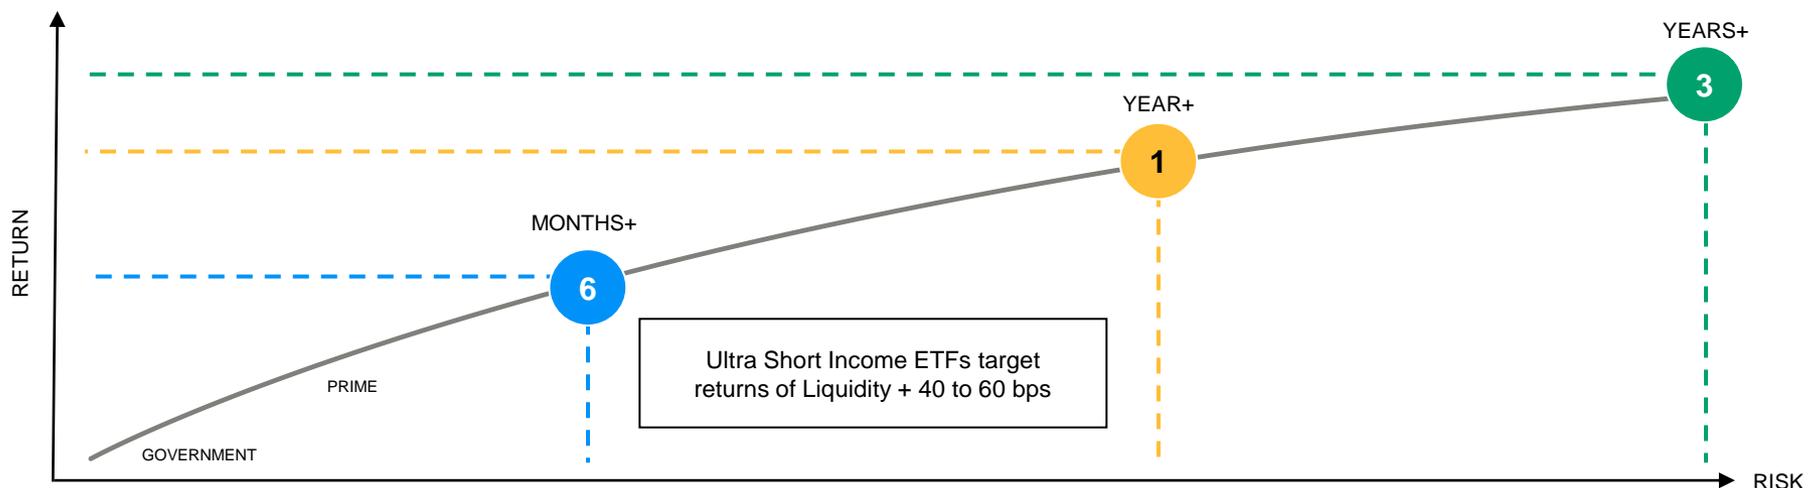

Firm-wide resources and insights are shared with all clients

Long-term views may help inform a client's more immediate investment decisions

Source: J.P. Morgan Asset Management as of March 31, 2023. All assets in billion USD. ¹Short Duration is managed as part of Fixed income. ²Liquidity includes cash swept from other sectors. Figures will not match financial reporting which exclude cash sweeps.

Putting your cash to work

Identify the right investment strategy for each cash segment and utilize longer-term investments where appropriate for enhanced return potential

Liquidity

Includes AAA-rated T+0 and T+1 money market funds

Operating

Ultra-Short Duration

Delivers a low volatility strategy which seeks to provide an additional return over money market funds

Reserve

Short Duration

Maintains a moderate level of volatility potentially offering an additional return over a low duration market index

Strategic

These targets are the investment manager's internal guidelines only to achieve the fund's investment objectives and policies as stated in the prospectus. The targets are gross of fees and subject to change. There is no guarantee that these targets will be met.

Ultra Short Duration: the ‘sweet spot’ between Liquidity and Short Duration

	Liquidity	Ultra-short duration ¹	Short duration
Main Strategy Objectives	Capital preservation Liquidity	Low volatility of principal liquidity	Effective credit and duration management

Asset-backed securities	✓*	✓	✓
Corporates	✓	✓	✓
Agency securities	✓	✓	✓
Treasuries	✓	✓	✓
Mortgages	-	✓	✓

Source: J.P. Morgan Asset Management. ¹EUR, RMB, SGD, HKD and SEK currencies are typically hedged exposures in the Ultra-Short Duration strategy. All information displayed is subject for discussion and adjustment in the context of separately managed accounts. All mutual funds are subject to their regional and structural regulatory requirements and the guidelines set forth in their respective prospectuses. * Asset Backed Commercial Paper is permitted in Money Market Funds.

Market Outlook

March 2023

Market Themes

- > Elevated interest rate volatility given concerns around inflation and financial sector stability
- > Credit spreads have widened on macroeconomic and financial sector concerns
- > Central banks are dealing with tight labor markets, high inflation and financial sector concerns
- > Geopolitics; Russia-Ukraine conflict

Investment Strategy

- > Extending duration given anticipation of fewer interest rate hikes
- > Downgrade risk contained
Security selection is key
- > Maintain liquidity ladder
- > Diversify; repeat risk-off periods possible

How are we positioned?

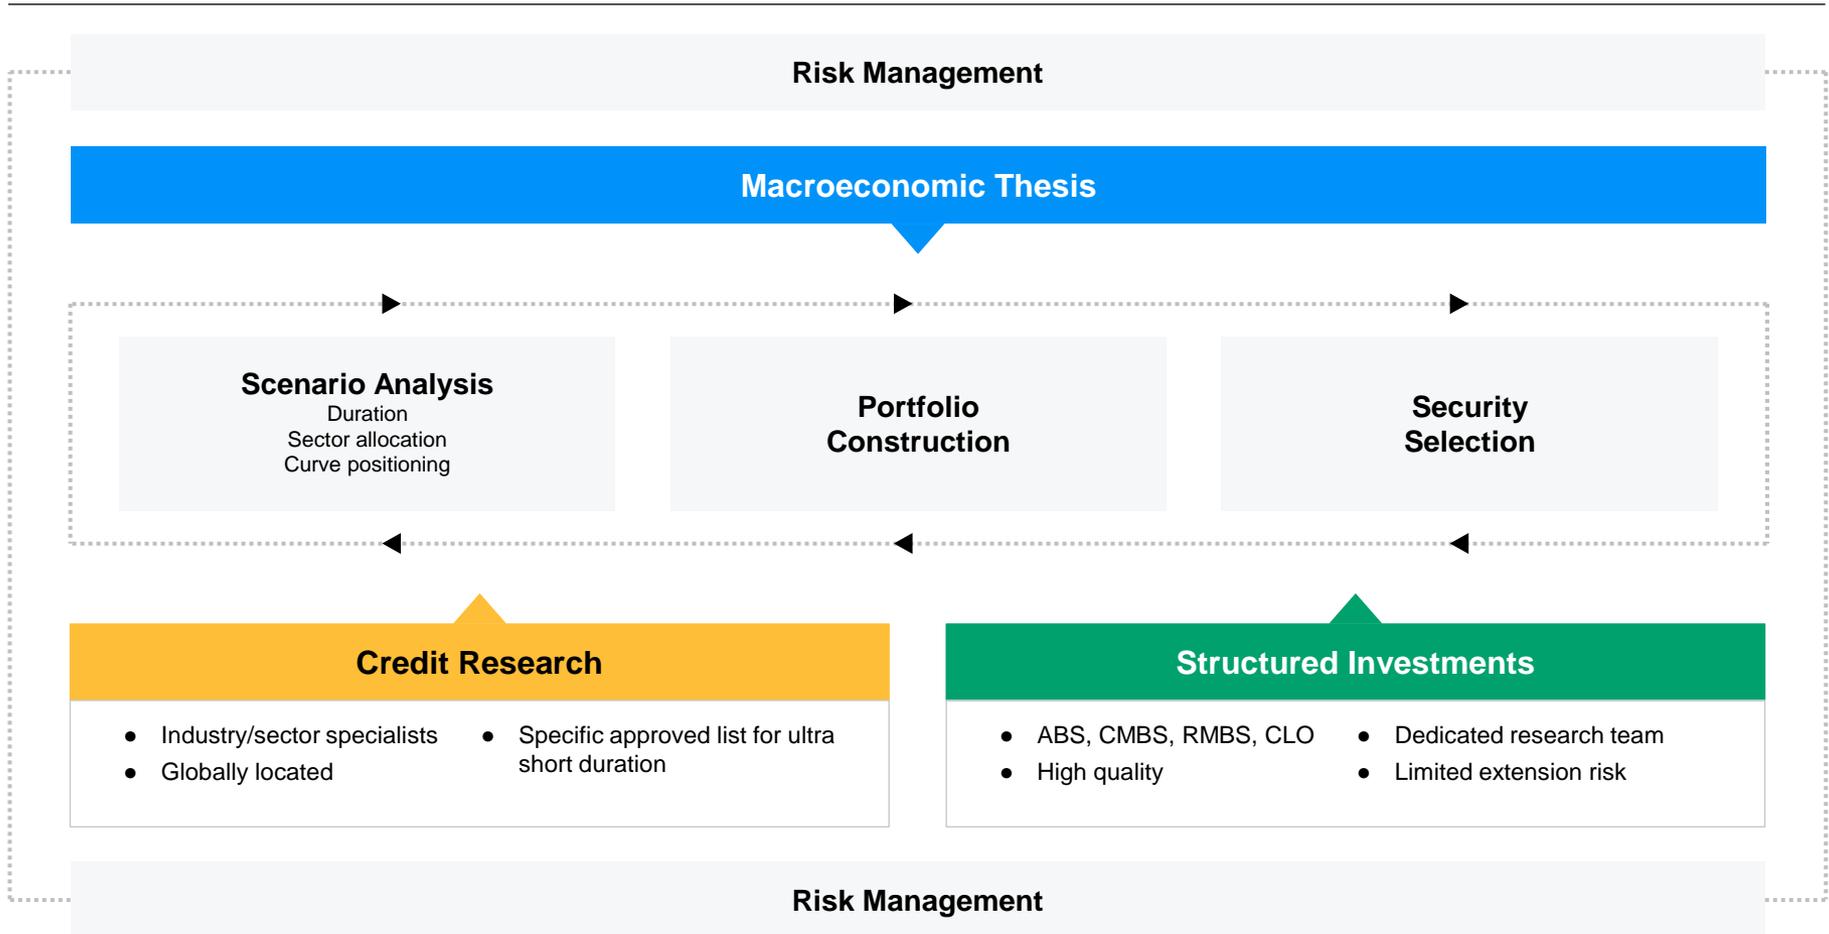

- > Focus on adding high quality duration whilst maintaining short-dated liquidity levels
- > Cautious on credit exposure, with an up-in-quality bias
- > Buying higher rated and staying diversified
- > High quality bias, AAA ABS, cross currency

JPM Ultra-Short Income UCITS ETFs

Our conservative investment process is designed to appropriately manage risk for an ultra-short portfolio

CLO- Collateralized Loan Obligations

RMBS – Residential mortgage-backed securities

CMBS – Commercial mortgage-backed securities

The portfolio risk management process includes an effort to monitor and manage risk, but does not imply low risk.

We take a conservative approach to managing corporate credit

Our strong credit approach and continuous oversight is an extension of the well established Global Liquidity platform

70+ ANALYSTS with sector specialization

Each credit is assigned to a single analyst

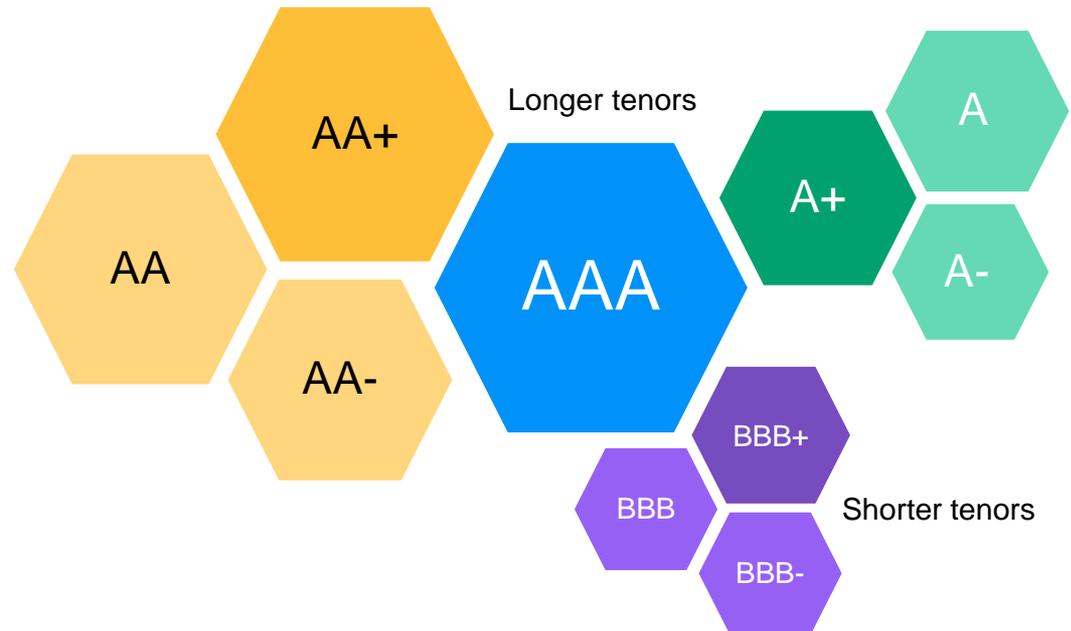

Internal Ratings Are Assigned
Drive concentration and tenor

Approved For Purchase List
A best practice for MMFs

Continuous Monitoring and Risk Management
Ensures compliance with internal tenor and concentration limits

ESG INTEGRATED
The systematic inclusion of financially material ESG factors (alongside other relevant factors) in investment analysis and investment decisions.

Concentration Representations:

For illustrative purposes only. ESG refers to environmental, social and governance factors. In actively managed assets deemed by J.P. Morgan Asset Management to be ESG integrated under our governance process, we systematically assess financially material ESG factors including sustainability risks in our investment decisions with the goals of managing risk and improving long-term returns.

Security selection: Discipline around position size and tenor parameters

The ETF suite leverages the Global Liquidity credit risk framework

		Global Cash			Ultra-short Duration		Ultra-short Duration ETF Suite	
Moody's rating scale		JPM Internal ratings	Max Tenors (days)	Max Position Size (Conc.%)	Max Tenors (days)	Max Position Size (Conc.%)	Max Tenors (years)	Max Position Size (Conc.%)
P-1	Aaa	AAA	397	5.00	1100	3.00	5	3.00
	Aa1	AA+	397	5.00	1100	2.75	5	2.75
	Aa2	AA	397	5.00	1100	2.50	5	2.50
	Aa3	AA-	370	4.50	1100	2.00	5	2.00
	A1	A+	370	3.00	1100	1.50	5	1.50
	A2	A	280	2.00	1100	1.25	5	1.25
P-2	A3	A-	35	0.50	1100	1.00	5	1.00
	Baa1	BBB+	8	0.50	740	0.75	5	0.75
	Baa2	BBB	8	0.50	740	0.50	5	0.50
P-3	Baa3	BBB-	NA	NA	35	0.25	3	0.25

- All corporate issuers must be approved to purchase and then are assigned internal ratings
- Internal ratings establish maximum concentrations and maturities where higher-rated securities are allowed longer tenors and higher concentrations
- Monthly governance meetings tap the insights of portfolio managers, analysts, distribution, risk, legal and compliance teams

Securitized: 9.1%

Sovereign: 7.9%

Currency Exposures

EUR Denominated	92.72%
GBP Denominated	0.39%
CAD Denominated	1.59%
USD Denominated	5.30%

Past performance is not a reliable indicator of current and future results.

Average yield is using gross of fee data.

** Maturity distribution refers to weighted average life (WAL). Spread Duration¹: The sensitivity of the price of a bond to a 100 basis point change to its option-adjusted spread.

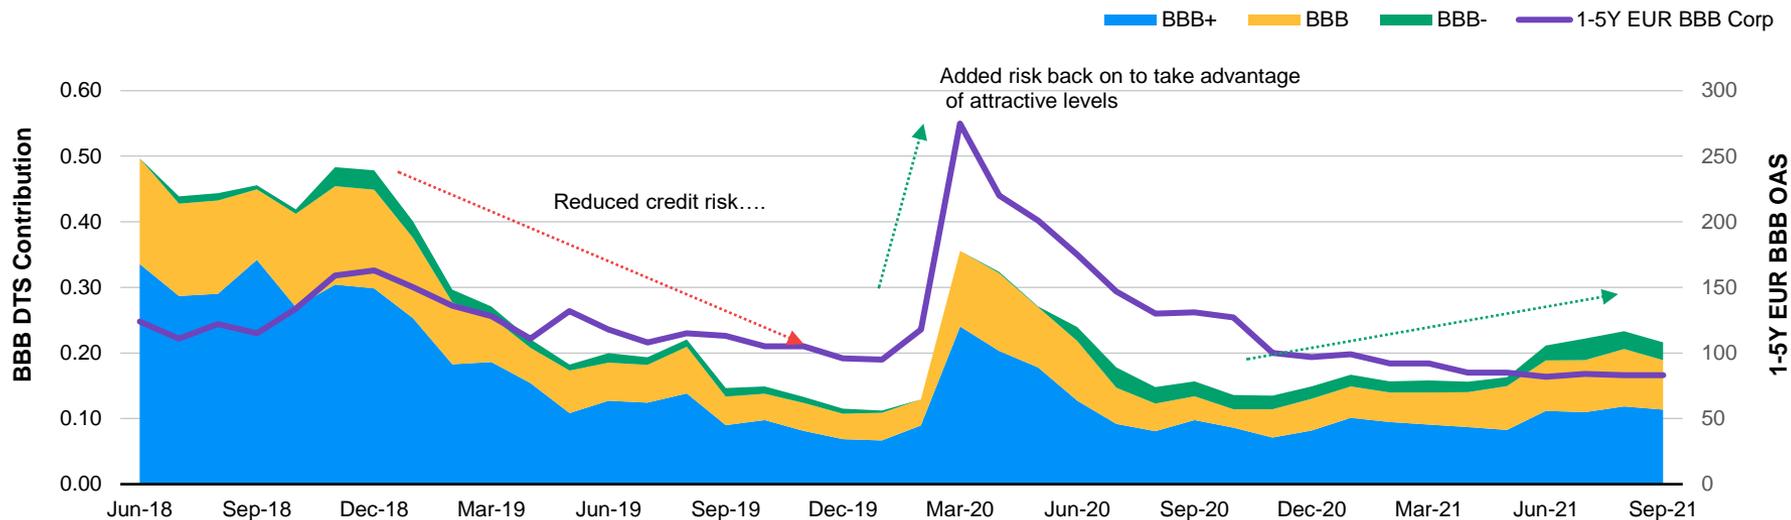

*** Quality distribution based on the lowest of split ratings. J.P. Morgan Investment Management (JPMIM) receives credit quality ratings on underlying securities of the portfolio from the three major rating agencies – S&P, Moody's and Fitch. When calculating the credit quality breakdown, JPMIM selects the lowest rating of the agencies when all three agencies rate a security. JPMIM will use the lower of the two ratings if only two agencies rate a security and JPMIM will use one rating if that is all that is provided. Securities that are not rated by all three agencies are reflected as such. The Fund can invest in high yield securities, but is all investment grade at this time. Securities with a rating of BBB or above from Standard and Poor's or Baa3 or above from Moody's are considered investment grade.

Key benefits of the Ultra Short Income ETFs

Built on the foundations of Global Liquidity

- Track record

Core Complement

- 'Cash and Up' or 'Fixed Income and Down'

Active

- Dynamic, Fundamental and applies the Global Liquidity's SFDR Article 8 framework

Liquid

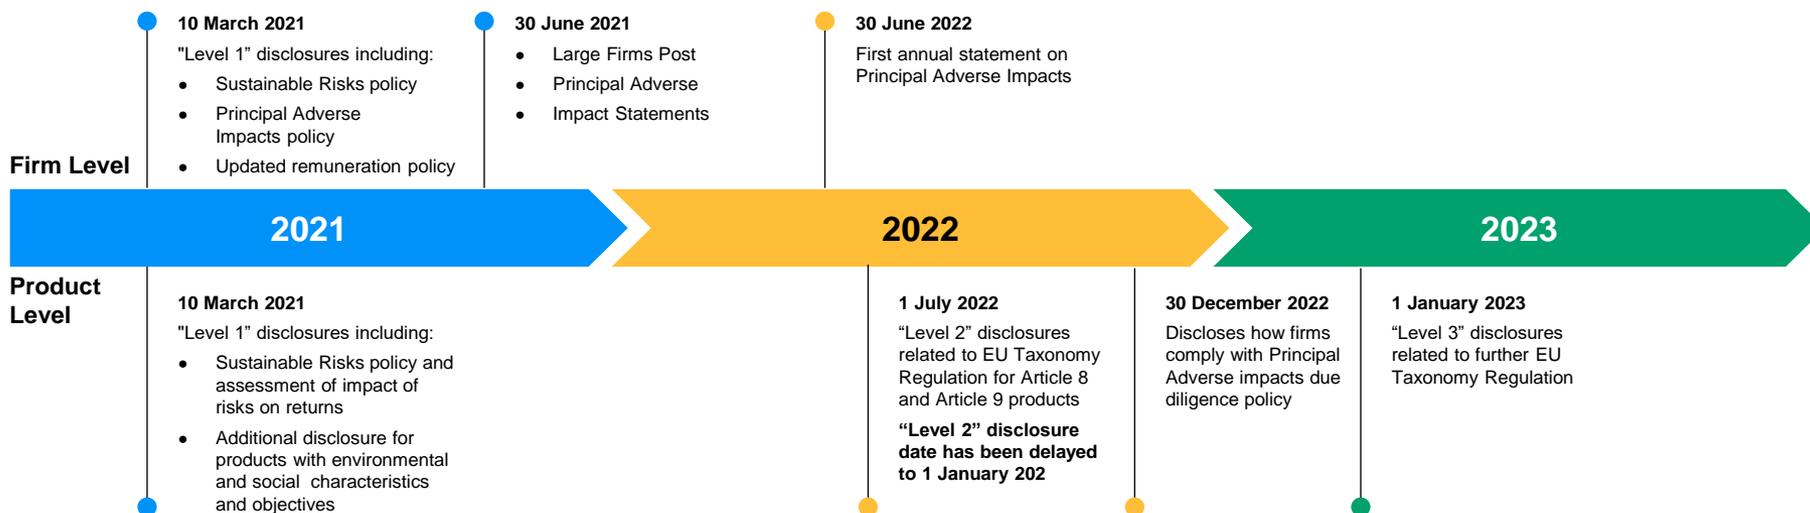

- Adapts the liquidity ladder to manage volatility

Appendix

EU SFDR Article 8

What is the EU Sustainable Finance Disclosure Regulation (SFDR)?

- SFDR is a **disclosure regulation** designed to provide transparency on the degree to which financial products have ESG characteristics, invest in sustainable investments, or have sustainable objectives.
- SFDR requires **firm-level** disclosures regarding Sustainability Risks and Principle Adverse Impacts.
- On a **fund-basis**, SFDR categorizes products into three distinct groups:
 - Article 6: Funds **integrating** ESG considerations into the investment process
 - Article 8: Funds **promoting good ESG** characteristics (i.e. a majority of assets must have good G & E/S characteristics)
 - Article 9: Funds with **sustainability** as an investment objective.

Source: J.P. Asset Management. For additional information please see our webpage "Understanding SFDR".

How has J.P. Morgan Asset Management approached Article 8?

Uplifted Article 8 Funds – J.P. Morgan Asset Management Investment Approach

Majority of assets with 'good' ESG characteristics

Funds have the following binding criteria:

51% of assets must have **good E and/or S** characteristics

- Securities must be within the top 80% threshold based on the E and/or S score

Securities deemed as good E and/or S must meet the **“good governance”** test whereby the security must be within the top 80% threshold based on the G score

A combination of both norms and values-based exclusions

Norms Based Full Exclusions:

- Serious Violations of UN Global Compact*

Values Based Full Exclusions:

- Controversial weapons
- White Phosphorous
- Nuclear Weapons, defined as exposure to: Nuclear Fissile Materials, Nuclear Warheads and Missiles, or Nuclear Intended Use-Component Parts

Values Based Revenue Threshold Exclusions:

- Conventional Weapons >10%**
- Tobacco Production >5%
- Thermal Coal >30%**
- Connection to Nuclear Weapons >2%***

Source: J.P. Morgan Asset Management As of July 2021. *Where the norms violation cannot be remediated in the near future or where the company has not shown any signs of addressing the issue, we will immediately exclude that company. Where it is less clear, we will engage with the company on the issue. **Turnover from production and/or distribution. ***Applied to companies not already excluded through nuclear weapons screen. An example of a connection to the nuclear weapon industry includes, but not limited to, weapon delivery systems. ESG = Environmental, social, governance. Exclusion does not necessarily mean zero exposure. Thresholds may apply for certain industries. The current exclusion policy can be found on our website.

Why is the Global Liquidity Approach different?

Global Liquidity investment solutions range from Money Market Funds (MMFs) to Ultra Short Duration strategies which blend money market securities and short term fixed income bonds. The products vary in what they hold but one commonality is a high proportion of Corporate Financial securities.

The J.P. Morgan Asset Management Article 8 approach combines exclusions, as well as a set of inclusionary criteria. Given the make up of the Global Liquidity funds, the impact on holdings and positioning was limited and hence the process was adapted for Global Liquidity to also include proprietary scores.

What proprietary score has Global Liquidity leveraged?

Global Liquidity have incorporated an additional **social consideration** within its assessment of investments that make up the 51% of assets within the portfolio. This incremental factor or score is based on a J.P. Morgan Asset Management proprietary methodology titled **Employee Engagement and Diversity (EE&D)**. The EE&D score is based on a variety of different data inputs measuring a **company's gender breakdown, diversity programmes, ethnicity score and equal pay score**. This score shall be applied in addition to the J.P. Morgan Asset Management standard ESG screens. In addition, beyond this 51% majority threshold requirement, Global Liquidity **seeks to engage** with companies which have low EE&D scores.

Provided to illustrate current investment process.

Source: J.P. Morgan Asset Management as of February 2022. ESG (Environmental, Social and Governance) integration is the systematic integration of material ESG factors in the investment process and does not always imply ESG factors as its key investment focus. Exclusion does not necessarily mean zero exposure. Thresholds may apply for certain industries. The current exclusion policy can be found on our website.

The Global Liquidity Four Step Approach to Article 8

Article 6 Fund ESG Integrated

Exclusions 1

Norms based exclusions

- UN Global Compact Violators

Values based exclusions

- Controversial weapons
- White phosphorus
- Nuclear weapons
- Conventional weapons
- Tobacco
- Thermal Coal

Asset backed securities (ABS)	✓	✓
Mortgage backed securities (MBS)	✓ Permitted in GBP Fund, Not in USD	✓
Derivatives (hedging only)	✓	✓
Non-base currency – maximum 33%	✓ Permitted in GBP and USD Funds	✓ EUR and GBP only
Municipals	✓	✓

Source: J.P. Morgan Asset Management. ¹ The ETF Sub-Fund also, on an ancillary basis, may invest in securities rated below investment grade or the unrated equivalent. A security's quality is determined at the time of purchase and securities that are rated investment grade or the unrated equivalent may be downgraded or decline in credit quality such that subsequently they would be deemed to be below investment grade. ² There are no maximum allocations to BBB securities for the GBP Fund however it is rated AA-f/S1+ by S&P so will have certain ratings rules applied at a fund level to retain this.

All mutual funds are subject to their regional and structural regulatory requirements and the guidelines set forth in their respective prospectuses.

Investment objective and risk profile

JPMorgan ETFs (Ireland) ICAV – USD Ultra-Short Income UCITS ETF (JPST LN)

Investment objective

The Sub-Fund aims to provide current income while seeking to maintain a low volatility of principal.

Risk profile

- > The value of your investment may fall as well as rise and you may get back less than you originally invested
- > To the extent that the Sub-Fund uses financial derivative instruments, the risk profile and the volatility of the Sub-Fund may increase.
- > The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. These risks are typically increased for below investment grade debt securities which may also be subject to higher volatility and lower liquidity than investment grade debt securities. The credit worthiness of unrated debt securities is not measured by reference to an independent credit rating agency
- > Asset-backed, collateralised loan obligations and mortgage-backed securities may be less liquid than other securities in which the Sub-Fund will invest, subject to adverse changes to interest rates and to the risk that the payment obligations relating to the underlying assets are not met
- > The Sub-Fund may be concentrated in the banking industry and in the US sectors, markets and/or currency. As a result, the Sub-Fund may be more volatile than more broadly diversified funds.

Risk and Reward Profile

Lower risk

Higher risk

Benchmark: ICE BAML 3-Month German Treasury Bill Index (Ticker: G3DB). ¹Performance is based on the Net Asset Value (NAV) with distributions reinvested (gross of shareholder tax) where applicable in EUR. All calculations are net of any applicable ongoing charges incurred by the share class. Performance is shown based on the NAV which may not be the same as the market price of the ETF. Individual shareholders may realize returns that are different to the NAV based returns. Excess returns are geometric. JPMorgan Liquidity Funds – EUR Liquidity LVNAV Fund: the Money Market Fund is not a guaranteed investment. An investment in Money Market Funds is different from an investment in deposits as the principal invested in a Money Market Fund is capable of fluctuation. The Money Market Fund does not rely on external support for guaranteeing the liquidity of the Money Market Fund or stabilising the net asset value per unit or share. The risk of loss of the principal is to be borne by the investor.

Past performance is not a reliable indicator of current and future results.
