This is a marketing communication. Please refer to the prospectus and to the KID or KIID before making any final investment decisions.

For Professional Clients and Qualified Investors only — Not for retail use or distribution

**J.P.Morgan**  
ASSET MANAGEMENT

# Executive Summary

---

## JPMorgan ETFs (Ireland) ICAV - Carbon Transition Global Equity (CTB) UCITS ETF (JPCT\*)

### EXPERTISE

- To respond to climate change, the transition to a low carbon economy will **impact companies, portfolios, and investors.**
- Our clients will have to respond **to new regulations and guidelines.**
- JPMAM's Sustainable Investing Team and Quantitative Solutions group have built a **proprietary evaluation framework** to identify companies best positioned for the transition to a low carbon economy

### PORTFOLIO

- Takes a comprehensive approach to transition readiness that considers both risks and opportunities with a **significant reduction in emissions** coupled with **low tracking error to MSCI World**
- Evaluates companies based on how well they manage **Greenhouse gas emissions, Resources** (electricity, waste and water) and **Climate related risks**
- Supplements traditional data reported by companies with **alternative data** accessed via machine learning with broader coverage

### RESULTS

- **Core exposure to global equities** (~1% tracking error) with no region or sector deviations
- Targets a meaningful **reduction in carbon intensity** (at least 30%) compared to MSCI World
- Tracks a proprietary index that is compliant with the European Union's **Climate Transition Benchmark** framework for sustainable products
- **Competitively priced** at 0.19% TER

Provided for information only, not to be construed as a offer, research or investment advice. Investments involve risks and are not similar or comparable to deposits. Not all investments are suitable for all investors. Please refer to the applicable offering documents for further details. Risk management does not imply elimination of risks.

# Preparing your portfolio for the carbon transition

## Global Temperature Have Already Risen

Global Land and Ocean Temperature Anomalies  
(Degrees Celsius)

## Policy Response Will Impact Businesses

The transition to a low carbon economy will require:

**Fewer Fossil Fuels**  
Potentially by imposing carbon pricing or increased environmental regulation

**More Green Energy**  
Potentially through government subsidies for green energy

This will result in both risks and opportunities

We can help investors consider the transition-readiness of their portfolios

Provided for information on macro and industry trends, not to be construed as research or investment advice. Investments involve risks. Risk management does not imply elimination of risks.

# Carbon pricing initiatives will have an impact well beyond the energy sector

## Global emissions covered by carbon pricing initiatives

% of global greenhouse gas emissions

## Global greenhouse gases emissions by sector

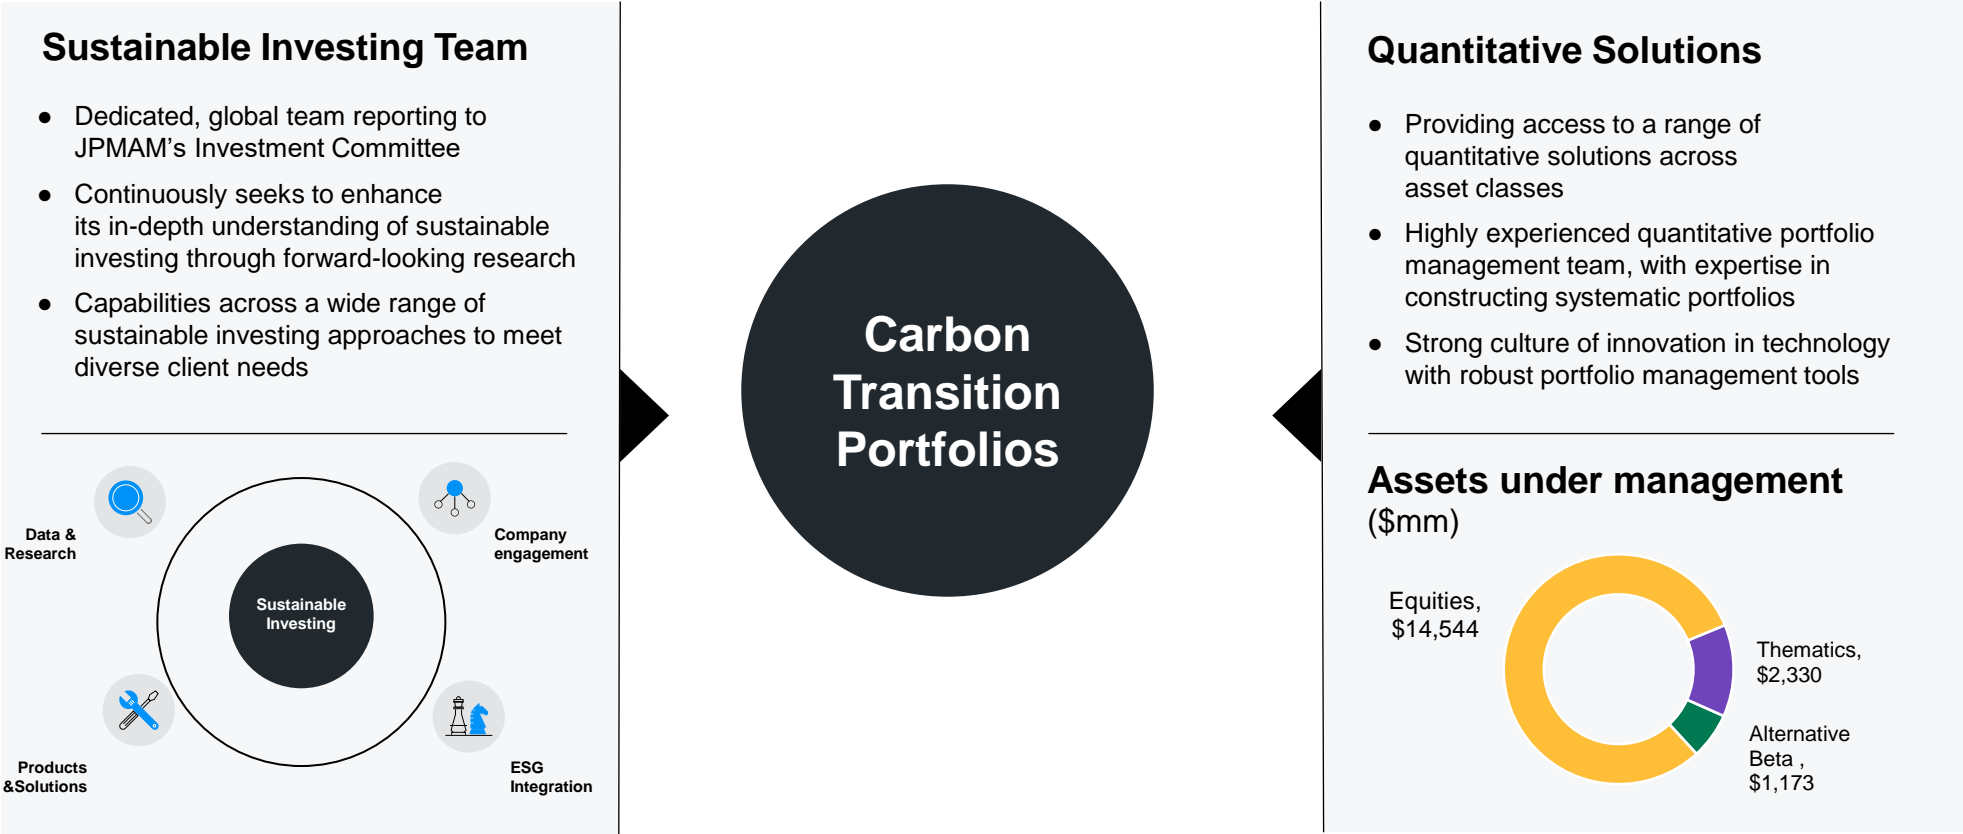

% of global greenhouse emissions (2016), CO2 equivalent tonnes

Source: (Left) World Bank, J.P. Morgan Asset Management. ETS is emissions trading system (Right) Climate Watch, Our World in Data, World Resource Institute, J.P. Morgan Asset Management.. China ETS price is the Shanghai ETS price up to July 2021, and the mainland price thereafter. CO2 equivalent tonnes standardise emissions to allow for comparison between gases. One equivalent tonne has the same warming effect as one tonne of CO2 over 100 years. Guide to the Markets - Europe. Data as of 31 March 2023. Provided for information on macro and industry trends, not to be construed as research or investment advice. Investments involve risks Opinions, estimates, forecasts, projections and statements of financial market trends are based on market conditions at the date of the publication, constitute our judgment and are subject to change without notice. There can be no guarantee they will be met.

# Bringing the key capabilities of JPMAM to carbon transition investing

J.P. Morgan’s Sustainable Investing and Quantitative Solutions teams partner closely in developing carbon transition solutions for clients

Source: J.P. Morgan Asset Management (JPMAM) as on 31 March 2023. ESG = Environmental, Social, Governance The manager seeks to integrate environmental, social and governance (“ESG”) factors in the investment process. ESG integration is the systematic integration of material ESG factors in company/issuer selection through research and risk management. It involves proprietary research on financial materiality of the ESG factors in relation to the relevant company/issuer and discretion to invest regardless of whether the company/issuer may be positively or negatively impacted by the ESG factors. Integration of ESG factors in does not imply ESG factors as the sole investment focus. Risk management does not imply elimination of risks.

# Building the portfolio

## Security Selection

Evaluate companies across the three pillars, backed by proprietary sustainable research

**Emissions**

**Resource  
Management**

**Risk  
Management**

Metrics based using data from companies, third-party providers, and indicators developed using machine learning via the ThemeBot

## Portfolio Construction

- > **Overweight**  
Companies that are positioned to benefit
- > **Underweight**  
Companies facing greater risks
- > **Maintain**  
Region and sector exposures in-line with a traditional index

Provided to illustrate team's current process, not to be construed as research or investment advice. Risk management does not imply elimination of risks.

# What does JPCT\* aim to deliver?

**Low Tracking Error**  
Tracking Error of around  
1% to MSCI World

**Lower Carbon Intensity**  
At least a 30% reduction in carbon  
intensity vs. MSCI World

**De-carbonization**  
7% year-over-year  
self-decarbonisation

**Competitive Fees**  
TER of 0.19%

Source: J.P. Morgan Asset Management, as at 1 March 2023. In line with the EU Climate Transition Benchmark, the reduction in carbon intensity will be at least 30% vs. the MSCI World. Provided for information only, not to be construed as an offer, research or investment advice. Investments involve risks and are not similar or comparable to deposits. Not all investments are suitable for all investors. Please refer to the applicable offering documents for further details. The manager seeks to achieve its objectives, there is no guarantee they will be met.

---

# Portfolio

# Greenhouse Gas Emissions Reporting

## Emissions Reporting: MSCI ACWI Index

Source: J.P. Morgan Asset Management, as at 31 March 23

## Defining the Three Scopes

- Scope 1 Emissions: Direct emissions generated on site, for example, at company facilities or via company vehicles.
- Scope 2 Emissions: Indirect emissions generated from electricity purchased or used by an organization.
- Scope 3 Emissions: This is the broadest scope and includes all other indirect emissions – ranging from those generated upstream (via purchases of input goods, business travel, etc.) as well as downstream (via distribution, the use of sold products, etc.)

## Emissions Reporting

- Reporting of Scope 1 and 2 emissions tends to be slightly higher than reporting of Scope 3 emissions
- Larger companies tend to report emissions more frequently than smaller companies
- Reporting frequency tends to be highest in Europe, with less frequency in North America and Emerging Markets

# How can we identify companies well positioned for this transition?

Proprietary evaluation framework evaluates transition readiness across three key pillars

## Emissions

### Site Emissions

Reduce direct emissions and shift towards greener forms of energy

### Consumer Emissions & Opportunities

Benefit from a shift in consumer demands towards low carbon alternatives

## Resource Management

### Electricity Management

Reduce indirect greenhouse gas emissions from the usage of electricity

### Water Management

Improve the sustainability of water flow management

### Waste Management

Reduce waste materials, both hazardous and non-hazardous

## Risk Management

### Physical Risk

Reduce impact from physical risks from extreme weather conditions

### Reputational Risk

Improve climate stewardship

Provided to illustrate team's current process, not to be construed as research or investment advice. Risk management does not imply elimination of risks.

# Proprietary Scoring Framework: Example Metrics

## Proprietary Framework

- Identifies companies well positioned for the transition to a low carbon world
- Developed by J.P. Morgan Asset Management’s Sustainable Investing Team, in partnership with the Quantitative Solutions group
- Metrics based using data from companies, third-party providers, and indicators developed using machine learning via the ThemeBot

	Indicator	Example Metrics
Emissions	Site Emissions	Scope 1 Emissions
		Fossil Fuel Use
	Consumer Emissions & Opportunities	Scope 3 Emissions
Resource Management	Electricity Management	Low Carbon Patents
		Sustainable Food or Transport Production
	Water Management	Scope 2 Emissions
		Electricity Usage
	Waste Management	Purchased Renewable Energy
		Water Efficiency
Risk Management	Physical Risk	Water Recycling
		Hazardous Waste Production
	Reputational Risk	Waste Recycling & Reuse
		Extreme Heat Value at Risk
		Coastal Flooding Value at Risk
		ESG-linked Compensation
		Environmental Fines / Sales

Provided to illustrate team’s current process, not to be construed as research or investment advice. Risk management does not imply elimination of risks.

# Identifying climate change solutions providers

Using alternative data sources to identify opportunities

## Identify Less Carbon-Intense Alternatives

### Renewable Energy

Energy generated from clean and renewable resources with low emissions (hydro, wind, solar, biofuels, etc.)

### Sustainable Transportation

Low emission transport technologies including electric and alternative fuel vehicles

### Sustainable Food and Agriculture

Vegan and vegetarian friendly, low emission food and agriculture technologies, including meat substitutes and dairy alternatives

## Improve Resource Efficiency

### Recycling & Re-Use

Environment friendly technologies to reduce waste, including equipment and material recycling and reuse

### Sustainable Water

Water technologies focusing on wastewater treatment, water purification and filtration

### Emission Transition

Focuses on carbon offset and reduced emissions, including energy efficiency consulting, building efficiency, and LED lighting

Provided for information only, not to be construed as a offer, research or investment advice. Investments involve risks and are not similar or comparable to deposits. Not all investments are suitable for all investors. Please refer to the applicable offering documents for further details.

# ThemeBot: Combining Artificial Intelligence with Big Data

Use of machine learning capabilities via J.P. Morgan Asset Management's proprietary ThemeBot tool to identify companies focused on the technologies spearheading a low carbon economy – and potential opportunities for innovation and future growth

Shown for illustrative purposes only.

# Proprietary Materiality Framework

Not every sector is impacted by the carbon transition in the same way. We use a proprietary framework to evaluate the materiality of each metric across sub-sectors

Less Material  More Material

 **Emissions**
 **Resource Management**
 **Risk Management**

Sector	Emissions			Resource Management		Risk Management	
	Site Emissions	Consumer Emissions & Opportunities	Indirect Emissions	Water Management	Waste Management	Physical Risk	Reputation Risk
Communication Services			Light Blue				Dark Blue
Consumer Discretionary		Light Blue	Dark Blue	Light Blue	Light Blue		Dark Blue
Consumer Staples	Light Blue	Light Blue	Dark Blue	Dark Blue	Light Blue		Dark Blue

# JPMAM for Carbon Transition

Building stronger portfolios for a low carbon world

## Proprietary insights

- In-house sustainable investing insights
- Supplements traditional data with data accessed via machine learning with broader coverage

## Comprehensive approach

- EU Carbon Transition Benchmark compliant
- Considers both risks and forward-looking opportunities, beyond just emissions

## Portfolio outcome

- Meaningful reduction in carbon intensity – without exclusions or sector bets
- Returns that are similar to a traditional benchmark<sup>1</sup>
- TER of 0.19%

<sup>1</sup>Returns based on the returns of the J.P. Morgan Asset Management Carbon Transition Global Equity Index as at 31 December 2022. Provided for information only, not to be construed as a offer, research or investment advice. Investments involve risks and are not similar or comparable to deposits. Not all investments are suitable for all investors. Please refer to the applicable offering documents for further details.

---

# J.P. Morgan's Commitment to Sustainability

# What is the Net Zero Asset Managers Initiative (NZAMI)?

The Net Zero Asset Managers Initiative (NZAMI) commits signatories to align emissions from their in-scope portfolios to net zero by 2050

## Signatories commit to:

Work with asset owner clients on decarbonisation goals

Set interim targets for portfolios to be managed in line with net zero by 2050 or sooner

Review interim target every five years with a view to including 100% of assets

## Three levers for J.P. Morgan Asset Management to fulfil this

Increasing client demand for Net Zero mandates

Increasing number of investee companies and governments committing to Net Zero – including via engagement

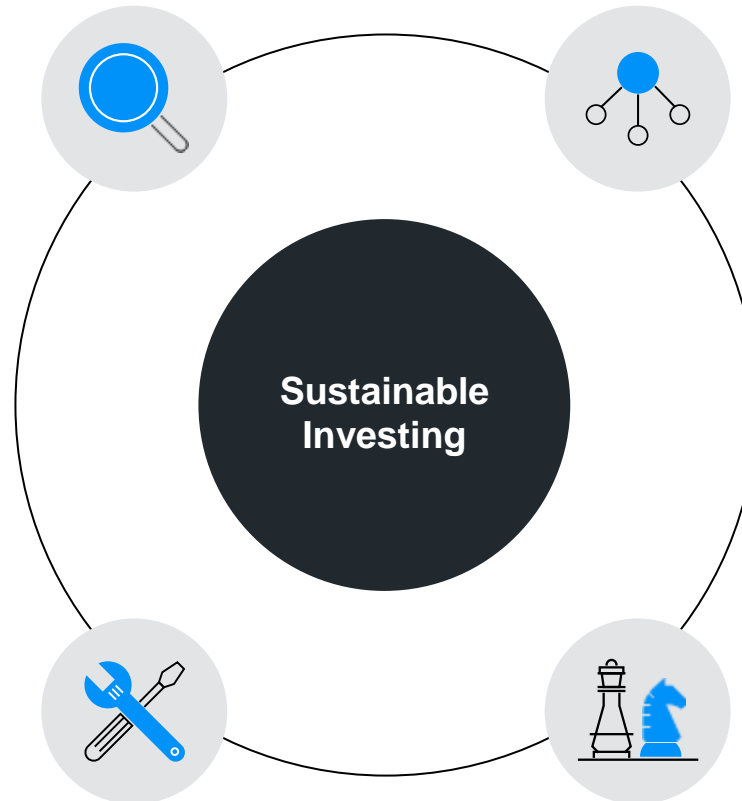

Increasing AUM in dedicated SI products with lower carbon footprint or intensity and reallocating portfolios

Source: J.P. Morgan Asset Management as of 5 May 2022. These targets are based on the realisation of assumptions made by the investment manager.

# Our sustainable investment platform is built around four key pillars

---

**Data & Research**  
We continuously seek to enhance our understanding of sustainable investing through forward-looking research

**Company engagement**  
Our corporate engagement work focuses on promoting good investment stewardship

**Products & Solutions**  
We offer capabilities across a wide range of sustainable investing approaches to meet a diverse client needs

**ESG Integration**  
We consider material ESG factors in portfolio-decision making across our Investment platform by using a proprietary forward-looking framework

# Exclusions

The fund reflects many of the shared environmental, social and governance values of our clients through the exclusion of certain industries and activities. As shown, we fully exclude some industries and apply maximum percentage thresholds to others, which can vary depending on whether the company is a producer, distributor or service provider.

	THRESHOLD EXCLUSIONS	FULL EXCLUSIONS
VALUES BASED	Conventional Weapons >10%* Tobacco production >5% Thermal Coal >30%* Revenue from connection to the nuclear weapons industry**** >2%	Controversial weapons White phosphorus Nuclear weapons*****
NORMS BASED**		Serious violations of UN*** Global Compact

\*Turnover from production and/or distribution

\*\*Where the norms violation cannot be remediated in the near future or where the company has not shown any signs of addressing the issue, the Investment Manager will immediately exclude that company. Where it is less clear, the Investment Manager will engage with the company on the issue.

\*\*\*UN stands for United Nations. The UN Global Compact is an initiative to encourage businesses worldwide to adopt sustainable and socially responsible policies, and to report on their implementation.

\*\*\*\*Applied to companies not already excluded through nuclear weapons. An example of a connection to the nuclear weapon industry includes, but is not limited to, weapon delivery systems.

\*\*\*\*\*Nuclear Fissile Materials, Nuclear Warheads and Missiles, or Nuclear Intended Use-Component Parts.

The above exclusion and inclusion criteria are subject to periodic changes without advanced notice. Any changes will be reflected in the policy document.

# Key Climate-Related Terms and Definitions

---

## WHAT ARE CARBON EMISSIONS?

- Greenhouse gases – such as carbon dioxide, methane, nitrous oxide, and others – make up a small percentage of Earth’s atmosphere but play a significant role in regulating the temperature of the planet. Because of their chemical make-up, these gases absorb heat radiated from Earth up towards space, trapping it in the atmosphere, and warming the planet.
- Greenhouse gas emissions are typically quoted in CO<sub>2</sub> (carbon dioxide) equivalent metrics – or “carbon emissions”

## HOW DO YOU MEASURE CARBON INTENSITY?

At a company level, carbon intensity is calculated as a company’s total carbon emissions relative to their enterprise value or sales. At a portfolio or index level, carbon intensity is calculated as a weighted sum of the individual companies’ carbon intensity as calculated above.

## WHAT IS THE PARIS AGREEMENT?

This global agreement, led by the United Nations, pursues efforts to limit the increase in global average temperatures to 1.5-2 °C above pre-industrial levels. It recommends that countries set reduced emissions targets (perhaps by instituting a tax on carbon which could impact a company’s bottom line) alongside other measures.

## WHAT ARE SCOPE 1, 2, AND 3 EMISSIONS?

In the late 1990s, the Greenhouse Gas Protocol was established to set accounting standards to measure and manage GHG emissions and encourage companies to report on their emissions via a corporate responsibility report. As part of this, the GHG Protocol defined three key “scopes” for categorizing emissions.

- Scope 1 Emissions: Direct emissions generated on site, for example at company facilities or via company vehicles.
- Scope 2 Emissions: Indirect emissions generated from electricity purchased or used by an organization.
- Scope 3 Emissions: This is the broadest scope and includes all other indirect emissions – ranging from those generated upstream (via purchases of input goods, business travel, etc.) as well as downstream (via distribution, the use of sold products, etc.)

## WHAT ARE SCIENCE BASED TARGETS?

The science based targets initiative advocates for and provides companies with guidance and a pathway to reduce greenhouse gas emissions. Companies who commit to science based targets seek to align their emissions reduction targets with the global carbon budget through transparent and credible action plans, and specify how much and how quickly they need to reduce their greenhouse gas emissions.

## WHAT IS SFDR?

SFDR is a new EU regulation introducing sustainability-related disclosure obligations for asset managers and financial advisers. Aims to provide more transparency on sustainability within the financial markets in a standardised way, thus preventing greenwashing and harmonizing ESG disclosures to ensuring comparability.

# Customising our Carbon Transition approach

## Scalable Investment Framework

Evaluate companies across the three pillars, backed by proprietary sustainable research

**Emissions**

**Resource Management**

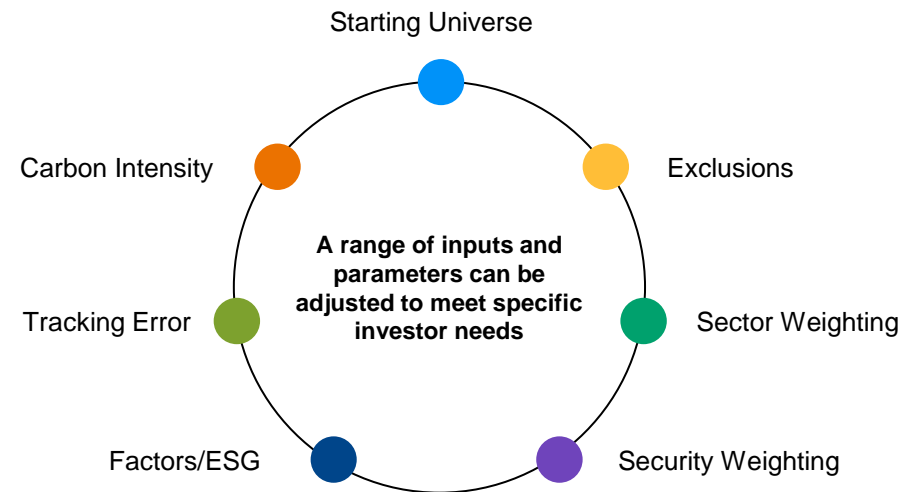

**Risk Management**

Metrics based using data from companies, third-party providers, and indicators developed using machine learning via the ThemeBot

# EU Sustainable Benchmark Regulations

The EU Commission has defined two standard benchmarks to benchmark assets for low-carbon and climate resilient economy

## Background

The European Commission has introduced minimum standards to help benchmark administrators design the 'EU climate transition' and 'EU Paris-aligned' benchmarks.

According to the European Commission, these are labels designed to **help investors looking to adopt a low-carbon investment strategy** and aim to:

- Improve transparency and comparability
- To benchmark assets for climate-friendly investments
- Prevent administrators from making misleading low-carbon claims ('greenwashing').
- The delegated regulation was adopted on 17 July 2020.

## J.P. Morgan Asset Management Global CTB Approach

- Incorporate Scope 3 across all sectors
- Include corporate evidence-based target setting as an explicit metric in portfolio construction

## Minimum Standards for EU Sustainable Benchmarks

	CTB Climate Transition Benchmark	PAB Paris Aligned Benchmark
<b>Exposure Constraints</b>	Minimum exposure to sectors highly exposed to climate change issues is at least equal to equity market benchmark value	
<b>GHG Emission Reduction target*</b>	30%	50%
<b>Baseline Exclusions</b>	-	Controversial Weapons Societal Norm Violators Tobacco
<b>Activity Exclusions</b>	-	Coal, Oil, Natural Gas and High Intensity Energy producers based on % revenues
<b>YoY decarbonisation of the benchmark</b>	7%	7%

\*Scope 3 emissions phased in. Source: J.P. Morgan Asset Management, as at 30 September 2020. Provided for information on macro and industry trends, not to be construed as research or investment advice. Investments involve risks

## Key personnel

---

### Yazann Romahi

Yazann Romahi, PhD, CFA, managing director, is CIO for Quantitative Beta Strategies focused on further developing the firm's factor-based franchise across both alternative beta and strategic beta. Prior to that he was Head of Research and Quantitative Strategies in Multi Asset Solutions, responsible for the quantitative models that help establish the broad asset allocation reflected across Multi-Asset Solutions portfolios globally. Prior to joining J.P.Morgan in 2003, Yazann worked as a research analyst at the Centre for Financial Research at the University of Cambridge and undertook consulting assignments for a number of financial institutions including Pioneer Asset Management, PricewaterhouseCoopers and HSBC. Yazann holds a PhD in Applied Mathematics from the University of Cambridge and is a CFA charterholder.

### Victor Li

Wei (Victor) Li, PhD, CFA, executive director, is Head of Equity and Alternative Beta Research and a portfolio manager in the Quantitative Beta Strategies group, based in London. Victor's primary responsibilities include the oversight of the team's research agenda, model development and portfolio management for both Alternative beta and Strategic Beta suite of products. He was previously a member of the quantitative research team in Multi-Asset Solutions, focusing on quantitative asset allocation, systematic and factor-based investment strategies. Prior to joining the firm in 2010, Victor completed a PhD in Signal Processing at Imperial College London, where he was also employed as a research assistant. Victor additionally has an MSc with Distinction in Communications Engineering from the University of Manchester, a BEng in Information Engineering from the Beijing Institute of Technology, and is a CFA charterholder.

### Aijaz Hussain

Aijaz Hussain, Vice President, is a portfolio analyst in the Quantitative Solutions group, based in London. Prior to joining J.P. Morgan Asset Management in 2016, Aijaz worked as an Analytics Consultant at FactSet Research Systems. Aijaz graduated from Imperial College London with a BSc in Mathematics.

# Investment objective and main risks

JPMorgan ETFs (Ireland) ICAV - Carbon Transition Global Equity (CTB) UCITS ETF (JPCT \*)

## INVESTMENT OBJECTIVE

The Sub-Fund seeks to provide returns that correspond to those of its Index.

## Summary Risk Indicator

The risk indicator assumes you keep the product for 5 year(s). The risk of the product may be significantly higher if held for less than the recommended holding period. In the UK, please refer to the synthetic risk and reward indicator in the latest available key investor information

## KEY RISKS

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The value of equities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.
- Since the instruments held by the Sub-Fund may be denominated in currencies other than the Base Currency, the Sub-Fund may be affected unfavourably by exchange control regulations or fluctuations in currency rates. For this reason, changes in currency exchange rates can affect the value of the Sub-Fund's portfolio and may impact the value of the Shares.
- The exclusion of companies that do not meet certain ESG criteria from the Sub-Fund's Investable Universe, through the screening performed as part of the index methodology described above, may cause the Sub-Fund to perform differently compared to similar funds that do not have such a policy.
- To the extent that the Sub-Fund uses financial derivative instruments, the risk profile and the volatility of the Sub-Fund may increase. That notwithstanding, the risk profile of the Sub-Fund is not expected to significantly deviate from that of the Index as a result of its use of financial derivative instruments.
- The Sub-Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Sub-Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index
- Further information about risks can be found in the "Risk Information" section of the Prospectus.

\* For Belgium only: Please note this ETF(\*) is not registered in Belgium and can only be accessible for professional clients. Please contact your J.P. Morgan Asset Management representative for further information. The offering of Shares has not been and will not be notified to the Belgian Financial Services and Markets Authority (Autoriteit voor Financiële Diensten en Markten/Autorité des Services et Marchés Financiers) nor has this document been, nor will it be, approved by the Financial Services and Markets Authority. The Shares may be offered in Belgium only to a maximum of 149 investors or to investors investing a minimum of EUR 250,000 or to professional or institutional investors, in reliance on Article 5 of the Law of August 3, 2012. This document may be distributed in Belgium only to such investors for their personal use and exclusively for the purposes of this offering of Shares. Accordingly, this document may not be used for any other purpose nor passed on to any other investor in Belgium. Please refer to the latest prospectus or Key Investor Information Document (KIID) for more information relating to the Fund.

The MSCI World Index was used by J.P. Morgan Asset Management as the reference universe for selection of the companies included in the Index. MSCI does not in any way sponsor, support, promote or endorse the Index. MSCI was not and is not involved in any way in the creation, calculation, maintenance or review of the Index. The MSCI World Index was provided on an "as is" basis. MSCI, each of its affiliates and each other person involved in or related to compiling, computing or creating the MSCI World Index (collectively, the "MSCI Parties") expressly disclaim all warranties (including, without limitation, any warranties of originality, accuracy, completeness, timeliness, non-infringement, merchantability and fitness for a particular purpose). Without limiting any of the foregoing, in no event shall any of the MSCI Parties have any liability for any direct, indirect, special, incidental, punitive, consequential (including, without limitation, lost profits) or any other damages in connection with the MSCI World Index or the Index.

## FOR PROFESSIONAL CLIENTS / QUALIFIED INVESTORS ONLY – NOT FOR RETAIL USE OR DISTRIBUTION

This is a marketing communication and as such the views contained herein do not form part of an offer, nor are they to be taken as advice or a recommendation, to buy or sell any investment or interest thereto. Reliance upon information in this material is at the sole discretion of the reader. Any research in this document has been obtained and may have been acted upon by J.P. Morgan Asset Management. The results of such research are being made available as additional information and do not necessarily reflect the views of J.P. Morgan Asset Management. Any forecasts, figures, opinions, statements of financial market trends or investment techniques and strategies expressed are, unless otherwise stated, J.P. Morgan Asset Management's own at the date of this document. They are considered to be reliable at the time of writing, may not necessarily be all-inclusive and are not guaranteed as to accuracy. They may be subject to change without reference or notification to you. It should be noted that the value of investments and the income from them may fluctuate in accordance with market conditions and taxation agreements and investors may not get back the full amount invested. Changes in exchange rates may have an adverse effect on the value, price or income of the products or underlying overseas investments. Past performance and yield are not a reliable indicator of current and future results. There is no guarantee that any forecast made will come to pass. Furthermore, whilst it is the intention to achieve the investment objective of the investment products, there can be no assurance that those objectives will be met. J.P. Morgan Asset Management is the brand name for the asset management business of JPMorgan Chase & Co. and its affiliates worldwide. To the extent permitted by applicable law, we may record telephone calls and monitor electronic communications to comply with our legal and regulatory obligations and internal policies. Personal data will be collected, stored and processed by J.P. Morgan Asset Management in accordance with our EMEA Privacy Policy [www.jpmorgan.com/emea-privacy-policy](http://www.jpmorgan.com/emea-privacy-policy).

As the product may not be authorised or its offering may be restricted in your jurisdiction, it is the responsibility of every reader to satisfy himself as to the full observance of the laws and regulations of the relevant jurisdiction. Prior to any application investors are advised to take all necessary legal, regulatory and tax advice on the consequences of an investment in the products. Shares or other interests may not be offered to or purchased directly or indirectly by US persons. All transactions should be based on the latest available Prospectus, the Key Investor Information Document (KIID) and any applicable local offering document. These documents together with the annual report, semi-annual report, instrument of incorporation and sustainability-related disclosures, are available free of charge in English from JPMorgan Asset Management (Europe) S.à r.l., 6 route de Trèves, L-2633 Senningerberg, Grand Duchy of Luxembourg, your financial adviser or your J.P. Morgan Asset Management regional contact or at [www.jpmorganassetmanagement.ie](http://www.jpmorganassetmanagement.ie). A summary of investor rights is available in English at <https://am.jpmorgan.com/lu/investor-rights>. J.P. Morgan Asset Management may decide to terminate the arrangements made for the marketing of its collective investment undertakings. Units in Undertakings for Collective Investment in Transferable Securities ("UCITS") Exchange Traded Funds ("ETF") purchased on the secondary market cannot usually be sold directly back to UCITS ETF. Investors must buy and sell units on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition investors may pay more than the current net asset value when buying units and may receive less than the current net asset value when selling them. In Switzerland, JPMorgan Asset Management (Switzerland) LLC, Dreikönigstrasse 37, 8002 Zurich, acts as Swiss representative of the funds and J.P. Morgan (Suisse) SA, 8 Rue de la Confédération, 1204 Geneva, as paying agent of the funds. JPMorgan Asset Management (Switzerland) LLC herewith informs investors that with respect to its distribution activities in and from Switzerland it receives remuneration which is paid out of the management fee as defined in the respective fund documentation. Further information regarding this remuneration, including its calculation method, may be obtained upon written request from JPMorgan Asset Management (Switzerland) LLC. This communication is issued in Europe (excluding UK) by JPMorgan Asset Management (Europe) S.à r.l., 6 route de Trèves, L-2633 Senningerberg, Grand Duchy of Luxembourg, R.C.S. Luxembourg B27900, corporate capital EUR 10.000.000. This communication is issued in the UK by JPMorgan Asset Management (UK) Limited, which is authorised and regulated by the Financial Conduct Authority. Registered in England No. 01161446. Registered address: 25 Bank Street, Canary Wharf, London E14 5JP.
