Sustainable bond investing without borders

The Global Bond Opportunities Sustainable Fund provides flexible, high-conviction exposure across the entire global fixed income market, with a specific focus on sustainability.

Expertise

- Highly experienced unconstrained portfolio managers Bob Michele and Iain Stealey leverage the proprietary research of a globally integrated team of 304 sector specialists.

Portfolio

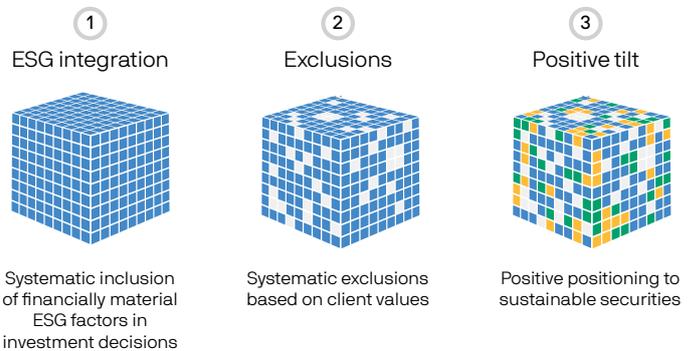

- Expands investment horizons beyond traditional fixed income sectors, dynamically adjusting asset allocation and duration as market conditions evolve.
- Reflects client values through robust environmental, social and governance (ESG) research, systematic exclusions to certain industries, and tilts towards issuers screening better on ESG criteria.

Results

- Seeks enhanced total returns and diversification vs. traditional bond funds.

Three steps to sustainability

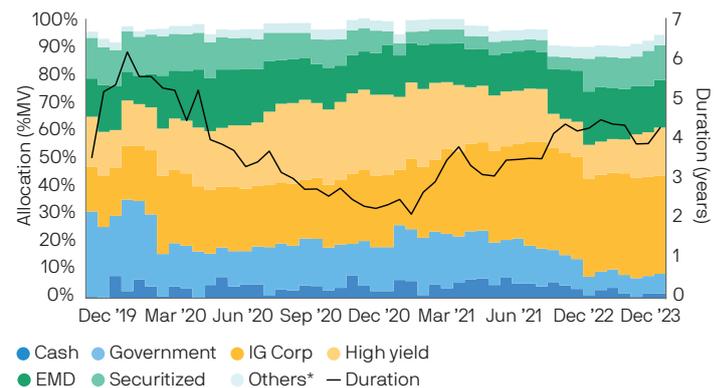

No benchmark, no bias, no borders

Without a benchmark as a starting point, the fund's dedicated unconstrained portfolio managers combine top-down and bottom-up approaches to build a flexible portfolio that taps into the highest conviction, best investment ideas of our sector specialists around the world.

This unconstrained approach allows the fund to adopt a conservative allocation in uncertain periods, moving tactically into higher-risk opportunities as conditions warrant. The fund can also adapt its sensitivity to interest rates (duration) depending on the economic backdrop.

Holdings, sector weights, allocations and leverage, as applicable, are subject to change at the discretion of the investment manager without notice. EMD: Emerging Market Debt, IG: Investment Grade. * Includes Convertible Bonds and Funds.

Historical portfolio positioning

Building a sustainable portfolio

- ESG integration:** We systematically assess financially material environmental, social and governance (ESG) factors including sustainability risks in our investment decisions with the goals of managing risk and improving long-term returns. ESG integration may not in itself change a strategy's investment objective, exclude specific types of companies or constrain a strategy's investable universe.
- Exclusions:** Systematic exclusions** are applied to certain industries and sectors to reflect our clients' values and expected business practices.
- Positive tilt:** The portfolio is actively tilted towards securities exhibiting positive ESG factors or momentum.

**The current exclusion policy can be found on our website. Exclusion and inclusion criteria are subject to periodic changes without advanced notice.

Investment objective

To achieve a return in excess of the benchmark by investing opportunistically in an unconstrained portfolio of debt securities (positively positioned towards Debt Securities with positive E/S characteristics and debt securities issued by companies and countries that demonstrate improving E/S characteristics) and currencies, using derivatives where appropriate. Debt Securities with positive E/S characteristics are those that the Investment Manager believes have been issued by companies and countries that demonstrate effective governance and superior management of environmental and/or social issues (sustainable characteristics).
