

J.P. Morgan Global Liquidity

European Domiciled Product Offering

As one of the world's largest liquidity managers, J.P. Morgan Global Liquidity believes in creating long-term, strategic relationships with clients by providing consultation, expertise and high-quality investment solutions. Our global capabilities allow us to provide a wide range of clients with the insights and solutions to meet their investment needs.

J.P. Morgan Global Liquidity offers a broad range of solutions for the investment of short-term cash balances to meet a variety of risk and return objectives. These include:

Liquidity Strategies

- **Short-term MMFs:** Our CNAV or LVNAV short-term MMF strategies take a conservative approach to managing high quality government and corporate credit, with a focus on capital preservation and liquidity. They offer investors a risk management tool for their operating cash balances and an investment horizon of 1 day+.
- **Standard MMFs:** Our standard VNAV MMF strategies take a conservative approach to managing high quality corporate credit, with a focus on capital preservation and liquidity and offer investors a solution that seeks to generate around 15-30 basis points of additional returns versus short-term money market funds or equally versus the 3-month Government Bill benchmark. The incremental risk/return profile sets the funds one step up from the short-term MMFs landscape, but takes less credit and duration risk than the ultra-short duration space.

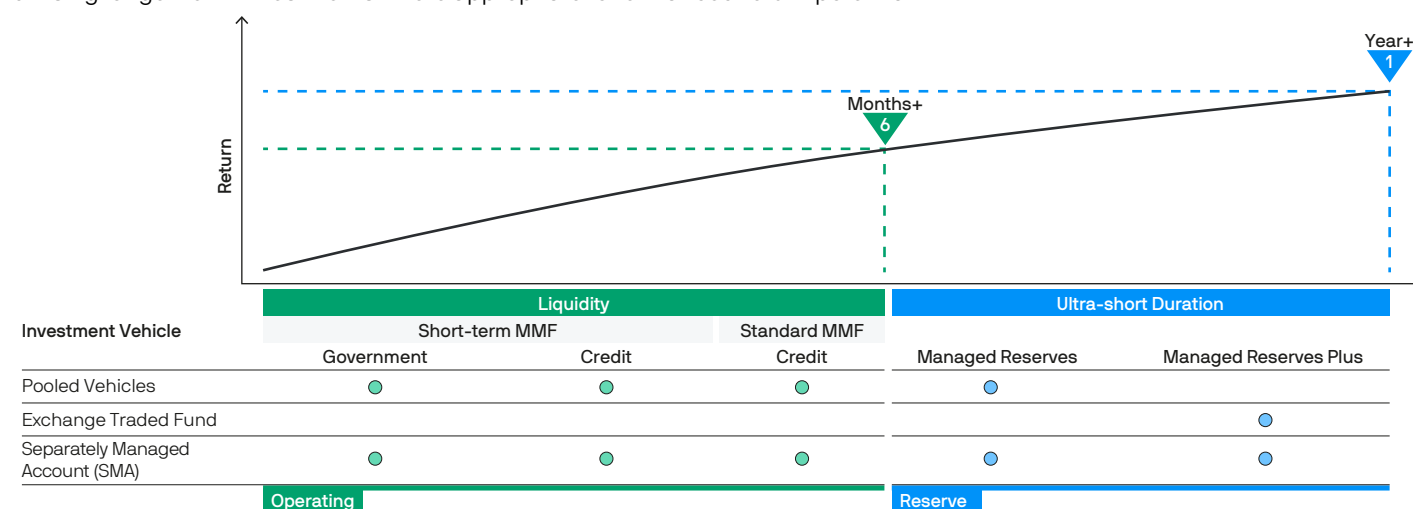

Ultra-Short Duration Strategies

- **Managed Reserves:** Our ultra-short duration strategies diversify risk across high quality, investment grade fixed and floating securities. The strategies seek to achieve incremental returns of between 20-60 basis points versus short-term MMFs or equally versus the 3-month Government Bill benchmark. The strategies are designed for reserve cash assets that have an investment horizon of six-months+ and is available as a fund, ETF or as a fully customised separately managed account. Our separately managed accounts allow investors to define their own parameters for security, returns and liquidity based upon their risk tolerance and cash flow needs.

CNAV: Constant Net Asset Value
LVNAV: Low Volatility Net Asset Value
VNAV: Variable Net Asset Value
MMF: Money Market Fund
ETF: Exchange Traded Fund

Put cash in its place

Utilising longer-term investments where appropriate for enhanced return potential
