## Appendix 1 – Changes to Sub-Fund names

### The changes

It is proposed to change the names of the Sub-Funds listed below with effect from 17 April 2025.

### Reason for changes

#### Addition of “Active” to Sub-Fund Names

Adding the word “Active” provides a clear indication that the Sub-Fund is an actively managed UCITS ETF and aligns with the naming convention for other “Active” sub-funds of the Fund.

#### Removing “(ESG)” from Sub-Fund Names

The European Securities and Markets Authority (ESMA), the EU’s financial markets regulator and supervisor, published guidelines on funds’ names using ESG or sustainability-related terms (“Guidelines”) on 14 May 2024.

To retain “ESG” in their names, the Sub-Funds would be required, under these Guidelines, to apply additional ESG inclusion and exclusion criteria, which the Board have determined would not be in the best interests of Shareholders. Consequently, “ESG” will be removed from the Sub-Fund names.

## Appendix 2 – Calculation of committed minimum to investments in companies / issuers with positive environmental and/or social characteristics and sustainable investments

### The changes

Currently, for the Sub-Funds listed below, the calculation of committed minimum to investments in companies / issuers with positive environmental and/or social characteristics (“investments in E/S characteristics”) and sustainable investments (“SI”) is expressed as a percentage of assets of a Sub-Fund. Ancillary cash, cash equivalents, money market funds and derivatives are excluded from “assets” (i.e. the denominator) in the calculation of such minimum investment percentage.

With effect from 17 April 2025, the minimum investment calculation for investments in E/S characteristics and SI will be expressed as a percentage of net asset value of a Sub-Fund. Accordingly, the following changes will apply to the Sub-Funds listed below:

- the allocation for investments in E/S characteristics will be adjusted from a minimum of 51% of a Sub-Fund's assets to a minimum of 51% of a Sub-Fund's Net Asset Value;
- the SI allocation will be adjusted from a minimum of 20% of a Sub-Fund's assets to a minimum of 20% of a Sub-Fund's Net Asset Value; and
- “Other” investments referred to in the Supplement Annexes of these Sub-Funds will be amended to include ancillary cash, cash equivalents, money market funds and derivatives (in addition to investments which do not qualify as exhibiting positive environmental and/or social characteristics).

Updates to references to allocation in investments in E/S characteristics, SI and “Other” investments, together with any consequential changes as necessitated, will be made to the Sub-Fund Supplements (including Supplement Annexes) to reflect the above adjustments.

### Reason for changes

This is to align with industry developments on calculation of committed minimum to SI and evolving regulatory expectations.

Please note that none of these updates represent material changes to how these Sub-Funds are managed or their respective risk profiles. There are no changes to the ESG characteristics of these Sub-Funds.

#### Current Supplement Wording

##### Investment Policy:

The Investment Manager fully excludes issuers that are involved with certain industries, such as controversial weapons (anti-personnel mines, biological/chemical weapons, cluster munitions, depleted uranium, white phosphorus) and nuclear weapons.

For certain other industries the Investment Manager applies maximum percentage thresholds typically based on revenue from production and/or distribution (which can vary depending on whether the company is a producer, distributor or service provider) which are derived from certain industries such as conventional weapons: >10%, tobacco production: >5%, power generation from thermal coal: >20%, thermal coal extraction: >20%, above which issuers are also excluded. "Revenue Threshold" is the percentage of an issuer's maximum revenue derived from the source indicated or, where noted otherwise, the maximum percentage of the Sub-Fund's assets that the investments can represent, e.g. capital expenditure in coal-fired power generation applies a threshold of >0 of assets. Exceptions are allowed for certain exclusions where the issuer meets particular criteria, such as having an approved Science Based Target in respect of reducing greenhouse gas emissions, through the Science Based Targets initiative, or generating above a particular threshold of revenue from renewables.

### Reason for changes

Sub-Funds categorized as SFDR Article 8 apply a minimum set of exclusions that are reviewed periodically and based on an underlying framework. The framework underlying these exclusions has been updated to consider evolving regulatory requirements, data availability and investor expectations. The exclusion policies of the Sub-Funds will be updated to correspond.

The Board believes that updating the Sub-Fund Supplements to reflect the main enhancements will provide investors with greater transparency on the exclusions which the Investment Manager implements in respect of the Sub-Funds.

Please note that none of these updates represent material changes to how these Sub-Funds are managed or their respective risk profiles. There are no changes to the ESG characteristics of these Sub-Funds.
