

JPMorgan Investment Funds - Global Macro Sustainable Fund (The “Sub-Fund”)

The Investment Manager is making changes to the Sub-Fund’s exclusion policy and Main Investment Exposure on 20 July 2026 as detailed below.

The Sub-Fund is updating its exclusion policy as outlined in detail on the following page to more closely align with the JPMorgan Asset Management exclusions policy framework, as well as with the policies of similar sub-funds managed by the Investment Manager.

The Sub-Fund is also updating its Main Investment Exposure and EU SFDR Pre-Contractual Disclosure as set out in the Prospectus to:

1. remove the reference to not having “long exposure in indices where 30% or more of the index is composed of securities that are on the exclusions list”; and
2. increase the limit on the aggregate long exposure via derivatives to excluded securities from 5% equity delta to 10% net equity exposure.

These changes seek to broaden the investment universe for the Sub-Fund and are not expected to have any material change on how the Sub-Fund is currently managed or on its risk profile.

If these changes do not suit your investment requirements, you may request the redemption of your shares, free of charge, in accordance with the terms of the Prospectus.

Unless specifically defined in this document, or the context requires, capitalised terms have the same meaning as in the Prospectus.

If you have any questions about this change or any other aspect of JPMorgan Investment Funds, please contact the Registered Office or your usual local representative.

Exclusion	Criteria	Criteria Update	Revenue Threshold - Current	Revenue Threshold - Proposed
